SUMMARY:

Highly skilled QA Engineer with over 5 years of experience in software testing, automation frameworks, and quality assurance. Proven expertise in designing, implementing, and maintaining robust automation frameworks using Java, Selenium, and other modern tools. Strong background in backend testing, data validation, cloud technologies, and API testing. Adept at working in fast-paced Agile environments, collaborating with globally distributed teams, and delivering high-quality solutions in the financial domain.

WORK EXPERIENCE:

Graduate Analyst, Clark University, Worcester, MA

Jan 2023 – May 2024

- Acted as a QA Analyst optimizing SQL queries for strategic, client-facing dashboards, cutting query time by 85%.
- Developed custom Python scripts for large dataset analysis, and automated data processing tasks using Python and Pandas, reducing preparation time by 30%.
- Designed dashboards and reports to track testing progress and defect resolution, ensuring transparency with stakeholders.
- Managed Jira queues for client-facing reporting issues, reducing ticket backlog by 25% and improving resolution times.

Software QA Engineer, Ericsson

August 2019 – July 2022

- Designed, implemented, and maintained a scalable automation framework using Java, Selenium, and Cucumber for web and API testing.
- Tested AWS-based applications, including framework design, virtualization, and data pipeline validation.
- Developed SQL-based automated reports that run daily, ensuring data freshness and accuracy for client-facing dashboards.
- Conducted end-to-end testing of applications, including API testing and mobile testing, ensuring optimal performance and user experience.
- Collaborated with distributed Agile teams to deliver high-quality solutions under tight deadlines.
- Performed API testing using Postman and Rest Assured for functional and performance validations.
- Monitored data freshness in customer-facing reports, ensuring real-time accuracy and contributing to a 15% improvement in client satisfaction.
- Supported Agile teams by actively participating in sprint planning, stand-ups, and retrospectives, ensuring alignment with project goals.

Associate Engineer, Ericsson

Jan 2019 – July 2018

- Created Excel-based reporting dashboards that aggregated data from multiple sources, allowing real-time monitoring of key performance indicators (KPIs).
- Automated data extraction and cleaning processes using Python scripts, integrated with Excel, to prepare datasets for analysis.
- Adapted reporting requirements during a major data migration, ensuring 99% on-time delivery and maintaining data freshness in client-facing reports.
- Designed and optimized complex SQL queries involving subqueries, CTEs (Common Table Expressions), and window functions, improving report performance by 50% and enabling deeper data analysis.

SKILLS:

- **Testing Types:** Unit Testing, Functional Testing, System Integration Testing, Regression Testing, GUI Testing, Web Service Testing, Browser Compatibility Testing
- **Programming Languages:** Python, Java, R, SQL, Bash
- **Database Management:** MySQL, Postgre SQL, Oracle
- **Data Analysis Tools:** Excel, R, Tableau, Power BI, Grafana
- **Python Libraries:** Pandas, NumPy, Matplotlib, SciPy, Scikit-Learn, Seaborn, Plotly
- **Tools:** Selenium, Appium, Jupyter Notebook, Google Colab, Postman, Jenkins, Git/GitHub.
- **Project Management:** Jira, HP ALM, MS Office Suite

EDUCATION:

Master of Science in Information Technology, Clark University, Worcester, MA, U.S.A.

August 2022 – May 2024

Bachelor of Technology in Computer Science Engineering, Amrita University, India

August 2015 - May 2019
