SUMMARY

Results-driven Data Analyst (4+ years) with expertise in requirements gathering, data-driven decision-making, and business process optimization across healthcare, banking, and supply chain domains. Skilled in SQL, Python, Tableau, and Power BI with hands-on experience in cloud solutions (AWS, Azure) and ETL pipelines. Proven track record of leading cross-functional teams, mentoring analysts, and delivering projects with measurable outcomes. Experienced in AI/ML predictive modeling to support data-driven forecasting and strategy. Adept in Agile methodologies, stakeholder management, and compliance (HIPAA, ISO 9001).

EXPERIENCE

*Bristol Myers Squibb, USA, **Data Analyst***

Jul 2024 - Present

Developed and maintained interactive dashboards to visualize key clinical metrics and improve project decision-making. Analysed clinical and operational data to identify trends, patterns and actionable insights that reduced project delays by 15%. Built SQL queries and data pipelines to extract, transform and load (ETL) data from multiple sources. Collaborated with data engineers and business stakeholders to ensure accurate and timely data reporting. Implemented CI/CD practices for analytics scripts using Git and version control, improving collaboration and reducing deployment errors by 25%. Led workshops with healthcare stakeholders to capture regulatory-compliant business requirements, producing detailed BRDs/FRDs. Designed and optimized claims & enrollment processes (Visio, BPMN), improving claims efficiency by 30%. Developed complex SQL queries and ETL pipelines for patient data analytics, enhancing reporting accuracy by 25%. Built AI/ML-driven predictive models (Python, Scikit-learn) for patient outcome forecasting and claims risk analysis. Designed interactive Power BI dashboards tracking patient outcomes, cost efficiency, and member satisfaction. Mentored junior analysts in SQL, Python, and BI tools, improving team productivity and knowledge sharing. Conducted risk assessments (SWOT, PESTLE), reducing operational risks by 15%. Supported UAT efforts, reducing post-deployment defects by 20%.

*Mphasis, India, **Data Analyst***

Aug 2018 - Mar 2022

Led requirements-gathering sessions for Banking Management System (BMS), improving operational efficiency by 40%. Applied machine learning techniques (Python, regression & clustering models) to derive insights for CRM integration, boosting customer retention by 15%. Designed financial forecasting models in Excel (VBA, Pivot Tables, Macros), driving 30% revenue growth insights. Developed ETL workflows using SSIS & Azure Data Factory, improving reporting accuracy by 35%. Implemented cloud data solutions (AWS S3, Redshift) to scale analytics and reporting workloads. Created Tableau dashboards for KPI monitoring, reducing reporting turnaround time by 25%. Facilitated Agile standups & sprint reviews, aligning stakeholders and reducing project delays by 20%.

EDUCATION

University of North Texas

*Master • **Information Systems & Technology** • Aug 2022 - May 2024*

LICENSES & CERTIFICATIONS

Microsoft Certified: Azure Administrator Associate

Microsoft •

Microsoft Certified: Power BI Data Analyst Associate

Microsoft •

SKILLS

Python • R • SQL • SAS • Excel • Agile • Scrum • Waterfall • SDLC • Business Process Improvement
