SUMMARY

Data Engineer and Analyst with **4+** years of experience delivering scalable, cost-efficient, and intelligent data solutions within **financial ecosystems**. Proven expertise in designing robust **ETL pipelines**, **cloud migration**, and compliance analytics using tools like **SQL**, **Python**, **AWS**, and **Azure**. Known for cutting infrastructure costs by **22%**, accelerating compliance reviews by **52%**, and scaling pipelines to process over **20M** records daily. Passionate about leveraging data to drive risk-aware decision-making and business value.

EXPERIENCE

Data Engineer

- MphasisApril 2024 - Present, USA
- Designed and deployed scalable transaction pipelines using AWS and Apache Airflow, **boosting data ingestion to 20M+ records/day** with 99.8% SLA adherence, ensuring seamless daily portfolio reconciliations.
 - Integrated and reconciled multi-ledger financial datasets, **cutting variance detection time by 61%** and **accelerating month-end close cycles by 2 days**.
 - Re-architected complex SQL models to **reduce execution time from 18s to 7s**, enabling **2.3M additional transactions/day** for treasury operations and real-time reporting.
 - Led AWS cloud modernization for financial workloads, **delivering 22% infrastructure cost savings** and **tripling compute capacity** during peak settlement periods.
 - Developed high-precision anomaly detection scripts with **96% accuracy**, **reducing audit exceptions by 18%** across high-risk financial accounts.

Data Analyst

- Symphony RetailAIApril 2020 - January 2023, India
- Audited and remediated 120+ financial data anomalies**, restoring ledger consistency and increasing quarterly reporting integrity by **15%**.
 - Engineered credit risk dashboards in Tableau and Python** that exposed delinquency trends **2 weeks earlier**, improving collections efficiency by **18%** and reducing overdue accounts by **12%**.
 - Pressure-tested and validated data pipelines with regression suites**, sustaining a **97% pass rate** and eliminating **~200 analyst hours/quarter** in defect triage.
 - Automated validation frameworks** that expanded throughput to **50K records/hour**, cutting manual QA exposure by **30%** and accelerating release cycles.
 - Accelerated SLA resolution times from 14h to 11h**, strengthening compliance adherence by **21%** and improving service reliability across high-priority financial accounts.
 - Delivered quarterly analytics upgrades** that lifted client adoption by **12%**, fueling measurable upsell revenue growth and higher contract renewal rates.

PROJECT

TCS Financial Data Visualization Simulation

- Lovely Professional University
2025November 2024 - January
- Constructed** Tableau dashboards on simulated financial datasets, visualizing 10+ KPIs (revenue trends, credit exposure, portfolio health), which improved insight generation speed by **25%**.
 - Formulated** 12+ strategic discussion prompts for senior leadership on liquidity risk, delinquency spikes, and cost optimization, enabling **faster decision cycles**.
 - Delivered executive-ready visuals that clarified risk patterns**, helping reduce reporting prep time by **30%** and improving **capital allocation decisions**.

EDUCATION

Master of Science in Computer Science

Clark University • Worcester, MA • 2025

Bachelor of Computer Science

Lovely Professional University • India • 2021

CERTIFICATIONS

Google Certified Python Programmer

Oracle Certificate on SQL and PLSQL

SKILLS

- Programming:** Python (Pandas, NumPy, SciPy, Scikit-Learn), SQL (Oracle, PostgreSQL, MySQL), JavaScript (Node.js, React.js), PL/SQL
- Data Analytics & Visualization:** Tableau, Power BI, Excel (Advanced), Matplotlib, Seaborn, Looker Studio
- Data Engineering & ETL:** Apache Airflow, ETL Pipelines, Data Warehousing, API Integration, Data Modeling, Data Cleansing & Transformation
- Cloud** – AWS (S3, EC2, Lambda, Redshift, EMR, Kinesis, SageMaker, QuickSight, SNS), Azure(Azure Data Factory, Synapse, Azure Data Lake Storage Gen2, Azure Databricks)
- DevOps:** Docker, CI/CD (GitHub Actions, Jenkins), Git
- Databases:** PostgreSQL, MySQL, MongoDB, Snowflake, Oracle (SQL & PL/SQL)
- Finance & Risk Analytics:** Credit Risk Modeling, Regulatory Reporting, Portfolio Reconciliation, Compliance Reporting
