

Adarsha Yemparala | Software Development Engineer

Edison, NJ, USA | +1 (732) 491-6939 | ayemparala981@gmail.com | LinkedIn | GitHub

SUMMARY

Experienced **Software Development Engineer** with nearly **3 years** of proven success in designing and deploying scalable applications. Adept at improving system performance, optimizing operations, and reducing costs through efficient solutions. Demonstrated expertise in full-stack development, microservices architecture, and cloud-native application deployment. Skilled in collaborating within Agile teams to deliver high-quality software solutions that enhance user experience and system reliability. Committed to driving continuous improvement and ensuring data security with best practices. Known for being a proactive problem-solver, delivering projects on time, and contributing to overall business objectives through innovative technology solutions.

EDUCATION

Master in Computer Science | California State University, East Bay

Aug 2022 to May 2024

Bachelor in Computer Science and Engineering | Vellore Institute of Technology, Amaravti, India

Aug 2018 to June 2022

CERTIFICATIONS

GCP Cloud Architect | GCP Associate Cloud Engineer | AWS Associate Developer

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript (ES6+), TypeScript, C#

Web Development: HTML5, CSS3, JavaScript, React.js, Angular, Node.js, Django, Flask, Spring Boot, Express, Vue.js

Databases & Version Control: MySQL, PostgreSQL, MongoDB, Redis, Git, GitHub, GitLab, Bitbucket

APIs & Cloud Platforms: RESTful APIs, GraphQL, WebSockets, AWS, Azure, Google Cloud (EC2, S3, Lambda, RDS, App Service)

Containers & Orchestration: Docker, Kubernetes

CI/CD & DevOps Tools: Jenkins, GitHub Actions, GitLab CI/CD, Terraform, Docker Compose, Ansible, Helm

Testing & Software Practices: Jest, Mocha, JUnit, PyTest, Cypress, OOP, MVC, Singleton, Factory, Agile (Scrum, Kanban), TDD, BDD

Security & Monitoring: OAuth2, JWT, RBAC, OWASP, HTTPS, SSL/TLS, Prometheus, Grafana, CloudWatch, New Relic

IDEs & Build Tools: VS Code, IntelliJ IDEA, PyCharm, Eclipse, npm, Webpack, Maven, Gradle

Soft Skills: Communication, Leadership, Collaboration, Time Management

PROFESSIONAL EXPERIENCE

Cisco Technology, NJ, USA

Jan 2024 - Current

Software Development Engineer

- Built and deployed cloud-native applications using AWS (EC2, S3, Lambda), improving data processing speed by 40% and reducing cloud costs by 25%, directly contributing to operational efficiency and cost savings.
- Engineered microservices with Spring Boot and Node.js, facilitating the scaling of the application to support 50,000+ daily active users and achieving 99.9% uptime, ensuring reliable user experiences during peak traffic.
- Implemented containerization via Docker and managed deployment workflows with Kubernetes, which decreased deployment time by 30%, reducing operational overhead and ensuring continuous integration and delivery.
- Developed and optimized RESTful APIs and GraphQL endpoints, enhancing the communication between microservices and enabling data exchange with a 20% increase in performance, leading to a smoother user interaction.
- Streamlined CI/CD pipelines using GitHub Actions and Jenkins, reducing release cycle time by 50%, which accelerated feature delivery and increased product stability.
- Introduced OAuth2 and JWT for authentication and authorization, enhancing system security and reducing incidents of unauthorized access by 30%, securing sensitive data across platforms.
- Monitored and enhanced system performance using Prometheus, Grafana, and AWS CloudWatch, proactively identifying system bottlenecks and optimizing infrastructure, cutting downtime by 20%.

Cybage Software, India

Jul 2021 – Jul 2022

Software Development Engineer

- Designed and developed full-stack applications using React.js and Spring Boot, increasing user engagement by 35% and improving system scalability to handle future growth.
- Optimized database performance by refining MySQL and PostgreSQL queries, reducing response times by 25% and cutting server load by 15%, which contributed to a more responsive and scalable platform.
- Built robust RESTful APIs and GraphQL services, streamlining communication between systems and improving data exchange speeds by 20%, enhancing the overall application performance.
- Automated deployment pipelines with GitLab CI/CD, minimizing manual intervention, reducing deployment errors, and improving release reliability, leading to faster deployment cycles.
- Collaborated within Agile Scrum teams, ensuring high-quality feature delivery, improving software performance, and increasing user satisfaction through timely releases.
- Implemented secure authentication protocols with RBAC, OAuth2, and JWT, ensuring compliance with security standards and mitigating potential data breaches by 25%.

Software Development Engineer Intern

- Created dynamic and responsive user interfaces using React.js, enhancing user experience and reducing page load times by 40%, improving user retention and interaction.
- Developed back-end services using Flask and Django, optimizing data processing and enhancing system responsiveness, which improved application speed and stability.
- Optimized MySQL queries, improving application performance and reducing data handling time, contributing to a smoother experience for internal users.
- Contributed to version control using Git, maintaining code consistency and collaboration across the team, ensuring smooth development cycles, and reducing integration issues.

PROJECTS

Profile Clustering (Capstone)**Technologies:** Python, Flask, sci-kit-learn, JavaScript

- Developed a Flask-based web application to recommend student profiles based on university selection criteria, improving user experience through an intuitive interface.
- Trained and optimized a machine learning clustering model with a dataset of 400 rows, achieving 83.75% accuracy, demonstrating proficiency in data preprocessing and model evaluation.

Todo Application**Technologies:** Spring Boot, React, MySQL, Swagger-UI

- Built a full-stack To-Do application, utilizing React for the frontend and Spring Boot for the backend, with real-time data synchronization and seamless user interactions.
- Integrated MySQL for data management and documented REST API endpoints using Swagger-UI, ensuring easy integration and future scalability.

Carpool Application**Technologies:** React, AWS Lambda, API Gateway, DynamoDB

- Architected a carpooling system using AWS Lambda and API Gateway, implementing a serverless backend for improved scalability and reduced operational costs.
- Utilized DynamoDB to store and manage user data efficiently, enhancing the matching process and ensuring low-latency access to carpool details.

My Portfolio**Technologies:** React, Python, AWS S3, CloudFront, API Gateway, Lambda

- Developed and deployed a personal portfolio website using React, hosted on AWS S3 with CloudFront for fast, reliable content delivery.
- Created a serverless Python backend using AWS Lambda and API Gateway to track visitors, providing real-time analytics and enhancing site interactivity.

E-commerce Website**Technologies:** React, Java Spring Boot, Microservices, PostgreSQL, Stripe API

- Built a scalable e-commerce platform with a microservices architecture, using React for frontend development and Spring Boot for backend services.
- Integrated Stripe API for secure payment processing and PostgreSQL for data storage, ensuring secure transactions and efficient data handling.
