EDUCATION

University of Massachusetts

Master of Science in Business Analytics

Amherst, MA

Sep. 2022 – Dec 2023

Sreenidhi institute of science and technology

Bachelor's of Science in Mechanical Engineering

India

Aug 2016 – Jun 2020

EXPERIENCE

Business Analyst

CVS Health

Feb 2024 – Present

Remote

- Collaborated with Cross functional and technical teams to support system configuration and optimization of Workday Financial modules, including Projects, Grants, and Billing, ensuring system capabilities align with business needs.
- Facilitated workshops and stakeholder interviews to identify system requirements, document business and functional specifications, and translate them into Workday configurations.
- Provided consultative support for API integrations with third-party systems by conducting root cause analysis, troubleshooting, and resolving system issues to maintain seamless data flows.
- Developed and executed detailed test plans and test scripts to validate system functionalities, configurations, and enhancements, achieving a reduction in critical defects during UAT.
- Created Business Requirement Documents (BRDs) and Functional Requirement Documents (FRDs) to support system changes and participated in developing change management plans for transitioning to new modules.
- Communicated effectively with project sponsors, implementation partners, and technical staff, ensuring adherence to project standards and alignment with business objectives.
- Supports vendor evaluations and Proof of Concepts (POCs), preparing Requirement Traceability Matrix (RTM) documents and conducting root cause analysis to address system performance issues.
- Delivers project presentations during the Software Development Life Cycle (SDLC), ensuring clear communication with management and stakeholders to drive successful project execution.

Student Supervisor

University of Massachusetts Auxiliary services

Sep. 2022 – Dec 2023

Amherst, MA

- Directed team operations by developing staff schedules, managing task assignments, and optimizing resource allocation, leading to improved performance and operational efficiency. Led training initiatives, ensuring adherence to safety protocols and operational procedures, while implementing inventory management strategies to reduce waste through proactive monitoring and demand forecasting.
- Collaborated with senior management to resolve operational challenges by providing data-driven recommendations, while fostering a positive work environment that improved employee engagement, reduced turnover, and maintained compliance with health, safety, and cleanliness regulations.

Business Analyst

Artificial Penetration software solutions

jun 2019 – July 2022

India

- Led the implementation and configuration of Workday Projects and Grants modules, aligning system functionalities with user requirements and best practices in public sector financial management.
- Collaborated with technical teams to develop configuration workbooks, test scripts, and validation scenarios for the Projects and Grants modules, ensuring compliance with business and accounting standards.
- Provided support for API integrations, data validations, and troubleshooting, ensuring system stability and optimized functionality.
- Led stakeholder interviews to drive process improvements, resulting in the creation of Business and Functional Requirement Documents (BRDs, FRDs) and user stories tailored for ERP systems. Facilitated communication between business and technical teams, led test planning, User Acceptance Testing (UAT), and provided ongoing support to users for successful project delivery
- Used Tableau for data validation, enhancing reporting accuracy for financial insights, and created operating procedures, user guides, and training materials to support new system implementations. Additionally, used Figma to design wireframes for web applications, fostering initial design discussions.

VOLUNTEERING

Operations Lead

The Donovan Venom

Nov 2024 – Present

Remote

- Managed end-to-end grant operations, including application processing, fund allocation, and compliance tracking.
- Streamlined grant management processes, ensuring timely and efficient fund disbursement.
- Collaborated with cross-functional teams to evaluate and approve grant applications in line with organizational policies.

Venture Capotal Business Analyst

Hp

Sep. 2024 – Nov 2024

Remote

- Performed comprehensive market research to assess startups and identify investment opportunities.
- Led deal sourcing, evaluation, and preparation of investment summaries to support strategic decision-making.
- Drafted detailed reports and analyses to guide venture funding initiatives and enhance portfolio performance.

PROJECTS

AI 2025 Tool Optimization | Agile, Sprint Planning, MS Project, Microsoft suite

- * Led the operationalization of the AI 2025 tool in 2025, managing team dynamics, stakeholder relations, and addressing resource challenges, resulting in 6,000 in cost savings.
- * Developed a comprehensive Statement of Work, Schedule, and Budget to align the project with Wall Street expectations, ensuring its successful execution and strategic impact.

Used Cars in United states Market | Neural networks, Regression, Tableau, Excel

- * Developed a data analysis project on the used car market, managing a dataset of 38,000 entries and ensuring data integrity through advanced statistical tools and techniques.
- * Conducted linear and logistic regression and cluster analysis to identify patterns and correlations, leading to a 38 percent increase in perceived value for a new car brand.
- * Collaborated with cross-functional teams to turn insights into actionable business strategies, driving improvements in market positioning, pricing, and customer segmentation
