Professional Profile

I am a detail-oriented and adaptable IT professional with extensive experience in system administration, data entry, and data science. I excel at leveraging advanced analytical tools and techniques to enhance data integrity and operational efficiency. I am adept at troubleshooting hardware/software issues, managing networks, and implementing cybersecurity measures. I am eager to apply my skills and knowledge to drive success in IT support, data entry, or data science roles.

Core Competencies

Data Science: Proficient in Python, R for data analysis, and machine learning applications.

Cyber Security: Knowledgeable in security practices, penetration testing tools (Metasploit, Wireshark).

IT Support: Experienced in hardware/software troubleshooting, network management, and cloud services.

Professional Experience

LuciaHealthcare (Remote)

United Kingdom

System Administrator / Data Entry Specialist

Jan 2022 – Dec 2023

- I conducted comprehensive testing of web applications, ensuring functionality, usability, and compatibility across browsers.
- I created and executed test cases, reported, and tracked issues using various tracking tools.
- I collaborated with development teams to resolve bugs and ensure optimal performance of websites and applications.
- I performed data entry tasks with high accuracy and attention to detail.
- I entered and verified data into systems, maintaining consistency and quality standards.
- I assisted in data cleansing and organizing, ensuring integrity and accessibility for future use.
- I provided technical support and troubleshooting for users experiencing software issues.

White House Concept

Ibadan, Nigeria

System Administrator

Feb 2019 – Jun 2021

- I maintained large databases and applied professional statistical techniques to collect, analyze, and interpret data from customers and partners.
- I identified and reported data issues, conducted detailed weekly reports, and actively participated in team meetings with managers.
- I developed and implemented new quantitative models to stabilize the business and maximize efficiency.
- I managed network infrastructure, ensuring reliable and secure connectivity for all users.
- I performed regular system updates and backups to safeguard data integrity.
- I provided training and support to staff on new systems and technologies.
- I resolved hardware and software issues promptly to minimize downtime.

Nigeria Television Authority

Ibadan, Nigeria

Student Intern (IT Support)

Feb 2015 – Jun 2015

- I kept records of the transmitter and all programs of the day as scheduled.
- I edited programs, captured programs for the day, and prepared the studio for programs.
- I troubleshooted any reported problems, installed, and configured new hardware and software.

Education

University of Wolverhampton

MSc, Cyber Security

United Kingdom

2024–2025

Kaunas University of Technology

MSc, Artificial Intelligence in Computer Science
Kaunas, Lithuania

2021–2023

National Open University of Nigeria

BSc, Computer Science
Abuja, Nigeria

2013–2018

Technical Skills

Programming Languages: Python, R

Data Analysis: Machine learning, Data visualization

Cyber Security: Penetration testing, Network security

IT Support: Hardware/software troubleshooting, Network management, Cloud services (AWS, Azure)

Tools: Metasploit, Wireshark, JIRA, Microsoft Office Suite

Projects

Web Application Testing Automation: I developed automated test scripts for web applications, reducing manual testing time by 40%.

Data Entry Optimization: I created a system for efficient data entry and verification, improving data accuracy by 30%.

Quantitative Model Development: I designed quantitative models that increased business efficiency by 25%.
