PROFESSIONAL SUMMARY

Computer and Information Science graduate with 1+ years of experience in data analysis, technology operations, and marketing communications. Skilled in Power BI dashboard development, SQL database management and AWS infrastructure deployment with Terraform. Proven ability to streamline workflows, manage large datasets (5,000+ records), and deliver data-driven solutions to improve efficiency. Proficient in Python, data visualization, Salesforce CRM, and Infrastructure as Code (IaC). Experienced in technical documentation and cross-functional collaboration. Seeking a junior software developer or data analyst role to leverage analytical and technical skills in creating effective technology solutions.

WORK EXPERIENCE

Technology & Transportation Support Team

Oct 2024 – Nov 2024

Saint Louis University – St. Louis, MO

- Implemented streamlined processes for equipment checkouts, reducing wait times and improving overall service delivery.
- Maintained accurate inventory records and performed regular audits, ensuring compliance with operational standards.
- Assessed user feedback to identify common issues, leading to targeted solutions that significantly improved service response times.
- Fostered a collaborative team environment, encouraging open communication and shared problem-solving among staff, which improved team productivity and morale.

Marketing Communications Intern

Sep 2023 – Oct 2023

Saint Louis University – St. Louis, MO

- Designed and executed a promotional video storyline to increase awareness of SLU Ride, the university's free transportation service.
- Developed storyboards, coordinated scene planning, and highlighted the use of the TripShot app for easy ride booking.
- Focused on creating an engaging, relatable student experience to boost app adoption among students, faculty, and staff.
- Communicated key service features, hours of operation, and app accessibility in a clear, user-centered manner.

Data Analyst

Apr 2020 – Mar 2021

Cloud Foundation – Hyderabad, India

- Integrated a diverse range of Sales data sources into Power BI solutions, incorporating Customer details, Purchase data, underwriting information, and external sources like market trends and competitor analysis, leveraging CRM Salesforce for customer relationship insights.
- Optimized Power BI reports and dashboards for performance and scalability, delivering a responsive and efficient data visualization experience for users across the organization.
- Stayed updated on emerging trends and technologies in sales data analytics, visualization, and machine learning, proactively identifying opportunities to innovate and enhance existing Power BI solutions, driving business value and competitive advantage for clients in the sales industry.
- Executed data analysis and reconciliations for Statement of Position and Statement of Cash.
- Developed dashboards using Tableau Desktop; implemented Row Level Security and User filters for data restriction.
- Built Tableau workbooks from multiple data sources using Data Blending.
- Performed troubleshooting, fixed, and deployed Python bug fixes for two main applications that served as critical data sources for both customers and the internal customer service team. Utilized CRM Salesforce to track and analyze customer interactions, enhance sales reporting, and improve data-driven decision-making.

EDUCATION

Master's, Computers and Information Science Saint Louis University – St. Louis, MO	Aug 2023 – May 2025
Bachelor's, Computer Applications Galaxy Degree and PG College – Hyderabad, India	July 2020 – June 2023

ACADEMIC & PROJECT EXPERIENCE

Master's Research Project- Employability Analytics Dashboard (HIREEDGE) Saint Louis University – St. Louis, MO	Jan 2025 – May 2025
• Developed a comprehensive Power BI dashboard analyzing employment market trends and job opportunities across Missouri, tracking over 5,000 job postings. • Created interactive visualizations for hiring demand analysis by location, salary insights across experience levels, and employment type distribution patterns. • Implemented dynamic filtering capabilities by job title, preferred work mode, experience level, and employment type to enhance user experience and data accessibility. • Analyzed hiring trends across multiple job categories including ML/AI, Data Science, Analysis, and Engineering roles to provide strategic workforce insights.	
Enterprise Architecture Project at Saint Louis University Saint Louis University – St. Louis, MO	Aug 2023 – Oct 2023
• Designed and implemented a scalable three-tier architecture on AWS using Terraform, automating infrastructure provisioning and management. • Utilized Infrastructure as Code (IaC) principles to create reusable modules for VPC, EC2, RDS, and Load Balancer components, enhancing maintainability and scalability. • Integrated best practices by configuring security groups, subnets, and IAM roles, ensuring a secure and compliant cloud environment.	
Compensation Management Analysis Galaxy Degree & PG College – Hyderabad, India	Feb 2023 – June 2023
• Compensation solutions were analyzed and implemented to have a better understanding of their significance in human resource management. • Examined various compensation strategies such as incentive plans, pay scales, and performance-based rewards to understand their impact on employee performance. • Researched industry standards to ensure alignment of compensation systems with organizational objectives and market competitiveness. • Designed and tested sample compensation structures to evaluate their influence on employee satisfaction and retention. • Investigated legal and ethical considerations in compensation planning and compliance. • Delivered a detailed report with strategic recommendations to enhance the effectiveness of compensation practices in management.	

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, R, C, HTML
- **Data Analysis & Visualization:** Power BI, Tableau (Row-Level Security, Data Blending), MS Excel
- **Cloud & Infrastructure:** AWS (EC2, RDS, VPC, IAM, Load Balancer), Terraform, Infrastructure as Code (IaC)
- **CRM & Business Tools:** Salesforce CRM
- **Productivity & Documentation:** MS Word, MS PowerPoint, Technical Documentation
