Summary

Data Analyst with strong Computer Science fundamentals and hands-on experience designing scalable data pipelines, distributed systems, and process automations. Proficient in SQL, Python, C++, and AWS. Skilled in Agile development, cross-functional collaboration, and delivering solutions that optimize operations, reduce downtime, and enhance system performance.

Education

Texas Southern University

Houston, TX

Bachelor of Science in Computer Science

Aug 2022 – May 2025

Relevant Coursework: Data Structures and Algorithms, Computer Networks, Database Management Systems, Software Engineering

Houston Community College

Houston, TX

Associate of Science in Computer Science

Aug 2017 – May 2019

Relevant Coursework: Python Programming, Advance OOP in C++

Technical Skills

Languages: C++, Python, Java, SQL, Bash, JavaScript

Databases: MySQL, PostgreSQL, MongoDB, DynamoDB

Technologies: Distributed Systems, TCP/IP Networking, REST APIs, Cloud Computing (AWS), Linux, Docker, Kubernetes

Methodologies: Agile (Scrum, Kanban), Root Cause Analysis, Systems Optimization, CI/CD Pipelines

Tools: Git, Jira, Power BI, Tableau, SQL Server, BigQuery, Jenkins, Terraform

Other: Data Structures and Algorithms, Object-Oriented Design, Multithreading, Performance Tuning

Experience

Home Depot

Houston, TX

Data Analyst

June 2023 – Present

- Developed and maintained SQL-driven data pipelines and Tableau dashboards, optimizing rental equipment logistics and reducing delivery failures by 30%.
- Collaborated with cross-functional teams to enhance the scalability of logistics systems, resulting in a 20% improvement in system performance.
- Led Agile sprints using Jira and Confluence, delivering automation solutions that decreased average cycle time by 20%.
- Conducted root cause analyses to improve system uptime and reliability, reducing service delays by 15%.

MedSys Group

Houston, TX

IT Analyst Intern

May 2021 – June 2023

- Supported database-driven Electronic Health Record (EHR) systems and automated patient management workflows using SQL and Python scripting.
- Reduced technical resolution times by 30% by designing scalable troubleshooting solutions for healthcare systems.
- Trained staff on best practices for distributed data entry and security protocols, improving operational efficiency.

Projects

Distributed Vending Machine Simulator (C++)

Personal Project

Developer

Aug 2023 – Sep 2023

- Built a multi-threaded C++ vending machine simulator handling concurrent transactions with robust error handling and state synchronization.
- Implemented modular system architecture and distributed controls to simulate high-load conditions.

Network Configuration and Automation

Personal Project

Developer

Jan 2024

- Configured scalable TCP/IP networks using Linux and Cisco tools; automated fault detection with Python scripts.
- Integrated network resilience testing, achieving 99.9% uptime in simulations.

Certifications

CCNA: Enterprise Networking, Security, and Automation

Google Data Analytics Professional Certificate

Microsoft Power BI Data Analyst Associate Certification
