Summary

Results-driven Business Systems Analyst with over 7 years of experience in agile methodologies, data analysis, and cross-functional collaboration, driving successful platform migrations, system optimizations, and defect resolutions across industries like insurance, healthcare, and technology

Skills & Tools

Technical Skills: Agile, SWOT Analysis, Gap Analysis, Case Management, Data Analysis, Billing System Support, ETL, Data visualization, Agile Methodologies, Integration Testing.

Soft Skills: Communication, Problem-solving, Customer focus, Critical thinking, Time Management, Stakeholder Management, Conflict Management, Analytical Thinking.

Tools: ServiceNow, Jira, Azure DevOps, JAWS, Postman, Visio, Selenium, Figma, Confluence, TestRail and Microsoft Suite.

Experience

Geico Chevy Chase, MD

(May 2025 – Current)

Business Systems Analyst

- Collaborate in requirements review meetings to validate “as-is” and map to “to-be” requirements across initiatives such as DMV Reporting, and Personal Auto Pricing Products.
- Engage in change control management, maintaining living documentation of requirement changes, dependencies, and ripple effects across test cases, training, and release notes.
- Conduct demos tailored to technical and business audiences, using real-world scenarios for stakeholder buy-in
- Utilize RTMs for UAT sign-off and release validation, guaranteeing full coverage of business requirements.
- Partner with QA to design and validate BDD scenarios in Gherkin, ensuring real-world usability for agents, customers, and Progressive Sales teams.
- Improve UAT code integrity and release planning by working with tech and product partners to implement a late add process.
- Test and sign off on 90 releases items consisting of defects and enhancements.
- Identify and resolve over 1000 defects with 248 being environmental issues.
- Coordinate triaging session to identify defects patterns such as OOS vs old new transaction processing.

United Therapeutics Corporation Silver Spring, MD

(September 2022 – April 2025)

Business Analyst

- Led the migration of an on-premises social listening and analytics platform to AWS to address scalability, data integration, and compliance challenges.
- Created user stories for the dashboard following the INVEST principles and defined acceptance criteria in Gherkin syntax.
- Managed the execution of user acceptance testing (UAT) for the social listening dashboard, creating test plans and documentation; this resulted in a 35% increase in dashboard efficiency and user specification alignment.
- Designed and documented workflow processes using activity diagrams and flowcharts to visualize data flow clusters, ensuring clarity and alignment across cross-functional teams.
- Led in-depth solution requirements analysis, which informed dashboard customizations and improved the analytical experience for end-users.
- Led JAD sessions to define and refine strategic product visions, developed comprehensive roadmaps,

- and managed epic updates in Jira to align with business goals and market demands.
- Designed wireframes showing user interfaces through service portals, implementing UI policies, actions, and client scripts for improved user experience.
- Revamped the company’s Standard Operating Procedures (SOP), significantly enhancing product quality and reducing overhead costs by 30% using SWOT Matrix.
- Developed detailed project estimates and monitored Service Level Agreement compliance, coordinating with stakeholders to ensure contractual deadlines and quality standards were consistently met.

Korak Healthsource

(August 2018 – April 2020)

Business Systems Analyst

- Designed wireframe for the website that houses physician and provider internal employment and external service contracts.
- Supported the design and implementation of data integration strategies to connect various healthcare systems and ensure data flows seamlessly across platforms.
- Collaborated cross-functionally with an underwriting team to identify 10+ trends in claims data, adjusting underwriting guidelines and reducing high-risk claims by 28%.
- Implemented Quality Management System practices aligned with organizational standards and OPAL framework principles, standardizing processes to improve project governance and deliverable consistency throughout the software development lifecycle.
- Created detailed use cases with interface and functionality mockups, supporting validation and ensuring alignment with stakeholder expectations.
- Applied trend analysis and process mapping to streamline patient support operations, achieving a reduction in response times and an increase in patient satisfaction ratings.
- Led a cross-functional change management project to refine clinical workflow processes, achieving a decrease in operational delays and a 30% enhancement in team productivity.

Education

Bowie State University, Bowie, MD

Master of Science Information Science

University of Ibadan

Bachelor of Science Statistics
