SUMMARY

Software Engineer with 3+ years of experience architecting and scaling high-performance distributed systems. Proven expertise in delivering robust, end-to-end backend solutions, production-ready AI applications, and optimizing database performance to drive measurable improvements in system efficiency.

TECHNICAL SKILLS

Languages: Java (Expert), Python, SQL, JavaScript, Kotlin, C++, Solidity, Shell Script, Ruby
AI/ML: LangChain, FastAPI, TensorFlow, RAG, Vector Databases (ChromaDB), Prompt Engineering
Backend Frameworks: Spring Boot, Microservices, Kafka, Hazelcast, GraphQL, RESTful APIs, React
Databases Cloud: Oracle (19c, Autonomous DB, Visual Builder, OCI), MongoDB, Elasticsearch (ELK), AWS, GCP
DevOps Tools: CI/CD (Jenkins, GitHub Actions), Git, Linux, Docker, Kubernetes, OpenShift, TDD/BDD, JUnit, Mockito, Splunk, Jira, Confluence, Control-M

EXPERIENCE

Knex LLC (An Oracle Partner)

Mountain View, CA

AI Product Engineering Intern

June 2025 – Aug 2025

- Architected a production-ready LLM solution for lease abstraction with structured JSON output, automating complex data extraction and reducing manual entry by over **90%**.
- Engineered and deployed a low-latency RAG chatbot using FastAPI, achieving sub-200ms response times for semantic queries across a knowledge base of thousands of legal documents.

Deutsche Bank

Bangalore, India

Software Development Engineer II (Master Data Management)

Jan 2023 – Jul 2024

- Architected a high-performance Java 8/Spring Boot 2.7 microservice that reduced user wait times by **70%** (from **15s** to **4.5s**), scaling to process **24M** records/hour with **99.999%** uptime.
- Spearheaded monolith-to-microservices migration on Kubernetes, leading **8** engineers to boost system scalability **600%** to support 5M+ concurrent users.
- Engineered an end-to-end orchestration service for **1.5M+** daily API requests to **2M** users, slashing customer onboarding time by **45%** and cutting data validation errors by **30%**.
- Built an ELK (ElasticSearch 7.x) ingestion pipeline for **17M+** daily records, boosting search performance by **65%** and cutting query latency from **8s** to **1.7s**.
- Mentored **5** junior engineers through technical documentation and TDD/BDD workshops, reducing onboarding time by **40%** and increasing team code quality by **35%**.

Software Development Engineer I (Compliance)

Jul 2021 – Dec 2022

- Built a fault-tolerant Spring Boot 2.5 microservice with React 17 handling **2K+** requests/minute, achieving **90%** test coverage and improving data accuracy by **35%**.
- Optimized data retrieval performance by **96.7%** (from **30 min** to **under 1 min**) by implementing Hazelcast 5.x in-memory caching with intelligent data partitioning for time-sensitive trading operations.
- Designed and integrated **7** microservices with Kafka 2.8 in a distributed architecture processing **7M+** daily messages, which reduced system failures by **65%** (from **25** to **3** incidents/month).
- Enhanced database performance for a system serving **2M+** users by refactoring Oracle 19c SQL queries and optimizing connection pooling, improving response times by **40%**.

PROJECTS

Cred AI: An AI-Powered Subscription & Budget Manager – Python, LangChain, Plaid API, Docker

- Developed an AI-driven system that analyses transaction data to automatically identify and flag **95%** of unwanted "zombie" subscriptions, providing users with actionable budget insights.
- Integrated Plaid API to securely aggregate real-time financial data, which enabled personalised AI recommendations and improved subscription detection accuracy by over **75%**.

DoorDashAgent: AI Customer Service Assistant – Python, LangChain, OpenAI API, Vector DB

- Architected a multi-source RAG pipeline that ingests and chunks data from internal policy documents and live web searches into a unified vector store for question answering.
- Developed a LangChain agent with custom tools that dynamically decides whether to query the internal knowledge base or search the web, significantly improving response relevance.

EDUCATION

Carnegie Mellon University

M.S. in Software Management (Focus: Computer Engineering), GPA: 4.0/4.0

Mountain View, CA

Aug 2024 – Dec 2025

PSG College Of Technology

B.Tech in Information Technology, GPA: 8.81/10.0

Coimbatore, India

Aug 2017 – May 2021
