Education

The University of Toledo

Bachelor of Science in Information Technology

August 2021 – May 2025

GPA: 3.98/4.0

Experience

The University of Notre Dame

ServiceNow Analyst

June 2025 – Present

South Bend, IN

- Collaborating with IT and academic departments to gather requirements and digitizing processes, impacting 500+ users.
- Writing and maintaining 20+ Business Rules, Script Includes, and UI Policies in JavaScript to support customized behavior and logic within the platform, enhancing efficiency and user experience.
- Developing and optimizing end-to-end automated workflows using Flow Designer and Workflow Editor in turn cutting fulfillment times by 40%.

The University of Toledo

Web Accessibility Analyst Intern

November 2023 – May 2025

Toledo, OH

- Improved website accessibility by 60% using data analysis, focusing on ADA (Americans with Disabilities) compliance metrics.
- Resolved 300+ annual Helpdesk tickets with a 50% reduction in response time, attaining a 98% user satisfaction rate.
- Translated user engagement metrics from Google Analytics into actionable design and UX recommendations.

Samwell AI

Data Engineering Intern

February 2024 – December 2024

United States

- Developed a paraphrasing tool using HuggingFace Transformers, NLTK, and Google Pegasus, enabling automated rephrasing for academic and professional users.
- Automated content SEO and meta-tags, enhancing data pipelines to improve performance and saved over 10 hours per week.

Gupshup Technologies

Cybersecurity Analyst Intern

May 2024 – August 2024

Remote

- Enhanced organizational security by 35% by developing and implementing standardized security protocols, performing audits of 100+ employee systems, and identifying vulnerabilities like outdated software and weak credentials, reducing risks by 40%.
- Increased organizational security further by comparing frameworks (NIST, CIS, ISO 27001, GDPR) to detect susceptibilities and identify areas for enhancement.

F13 Technologies

Cloud Analyst Intern

July 2023 – October 2023

Remote

- Constructed an interactive cost analysis dashboard using Python and data visualization tools, decreasing client infrastructure costs by 22% while leading cloud migration initiatives that resulted in a 30% cost reduction and 40% performance improvement.
- Upgraded deployment efficiency by 25%, obtained 7 AWS certifications (EC2, S3, Aurora, etc.), and implemented industry best practices to optimize cloud infrastructure, performance and usage.

Paypoint India

Data Analyst Intern

May 2022 – June 2022

Mumbai, India

- Developed a Tableau dashboard that automated report generation, decreasing report generation time by 65%, and providing data insights for over 3.2 million users.
- Projected a 10% user growth by identifying 50+ bugs and implementing improvements through rigorous QA testing of iOS apps.

Projects

AI Agent Builder | MindStudio

- Built AI Agents to automate processes such as sending emails, scheduling meetings, extracting key information from webpages to increase efficiency and reduce time spent on repetitive tasks

Web Data Scraping for Amazon Product Info | Python, Streamlit, BeautifulSoup, EDA

- Scraped and analyzed 500+ Amazon product listings using Python and visualized insights like price trends and ratings in a Streamlit dashboard, enabling buyers to make informed decisions and increasing user engagement by 30%.

Credit Card Fraud Detection System | SMOTE, Logistic Regression, Decision Tree, Matplotlib, Seaborn

- Engineered a credit card fraud detection system using Kaggle data and SMOTE, achieving 99% precision and lowered false positives by 100%, leveraging models like DecisionTree and Logistic Regression.

Leadership

Vice President, Association for Computing Machinery(Women's Chapter) – University of Toledo

2023 – Present

- Facilitated monthly mentoring circles, AI and ML workshops focused on career preparation and tech industry readiness.

Technical Skills

Programming Languages: Python, SQL(NoSQL/MySQL/PostgreSQL), JavaScript, R

Analytics: Tableau, Looker, Excel (PivotTables, PowerQuery), EDA, A/B Testing, Data Modeling, Regression, Statistics

Machine Learning: PyTorch, NumPy, NLP, LLM, HuggingFace Tokens, Matplotlib, WordCloud, Seaborn, AWS, GCP
