Education

University of Connecticut Storrs, CT

Master of Public Administration, Advanced Business Certificate in Health Care Analytics

GPA: 3.725/4.0

May 2025

Bachelor of Science in Allied Health Sciences, Public Health & Health Promotion Concentration, Public Policy Minor

GPA: 3.501/4.0

May 2024

Work Experience

Healthcare Policy Intern

Connecticut Office of Health Strategy, Hartford, CT

Aug 2024 - May 2025

- Engaged employers in Connecticut's healthcare affordability strategy by documenting key discussions, tracking follow-ups, and conducting outreach, resulting in a 30% increase in employer participation and strengthened policy support.
- Conducted policy research and literature reviews on healthcare affordability strategies and behavioral health access to inform local planning and support Certificate of Need (CON) analysts.

Data & Quality Improvement Intern

Child Health & Development Institute, Farmington, CT

Sep 2023 - Aug 2024

- Created a cross-initiative dashboard translating SPSS data to Excel, improving access to behavioral health insights and directly informing quality improvements in mobile crisis and outpatient programs.
- Advanced quality improvement initiatives (MATCH-ADTC, TF-CBT, CBITS) through ad hoc reporting, updating data analysis formulas, and contributing to evidence-based project development.

Public Health Fellow

Waterbury Health Department, Waterbury, CT

Jun 2023 - Aug 2023

- Led a Rapid Community Assessment evaluating vaccine-preventable disease preparedness, identifying gaps that shaped new outreach strategies and enhanced STI and tuberculosis response efforts.
- Designed surveys and gathered quantitative and qualitative data to assess community health needs, creating dashboards and visualizations in R and Power BI to present key findings.

Undergraduate Summer Researcher

University of Connecticut Health Center, Farmington, CT

May 2022 - Aug 2022

- Conducted research in Dr. Nilanjana Maulik's Molecular Cardiology and Angiogenesis Laboratory on myocardial angiogenesis, cardiac repair, and ventricular remodeling using Trx-1 overexpression, LAD ligation, scaffolds, exosomes, and stem cells, contributing to innovative therapeutic approaches for heart failure prevention.

Leadership & Volunteer Experience

HuskyTHON Miracle Network Dance Marathon

Mar 2022 - Mar 2024

- *Fundraising Volunteer* - Participated in an 18-hour dance marathon, raising \$800 to support Connecticut Children's Hospital and increase community awareness.

UConn Connects Program

Aug 2021 - Dec 2021

- *Mentor* - Guided 10+ students on academic probation toward improved academic standing through mentorship and leadership support.

Technical Skills

- IBM SPSS • SAS • R (Programming Language) • STATA • Adobe Acrobat • Tableau
- SQL (Programming Language) • JMP • Microsoft Office (Excel, PowerPoint, Word, Outlook, Teams & Power BI)
