

Adithi Keerthy Sharma

Data Analyst

(732) 734-4119 | adithisharma04@gmail.com | NY, USA | [LinkedIn](#)

SUMMARY

- 4 years of experience in leveraging advanced analytics, data engineering, and machine learning within the Finance and Healthcare domains to optimize operational processes and drive business value.
- Proficient in programming languages including Python, SQL, and R, with expertise in data analysis libraries such as Pandas, NumPy, and Scikit-learn for data manipulation and modeling.
- Experienced in designing and implementing scalable data pipelines and ETL processes using cloud technologies like Google Cloud Platform (GCP) and AWS, ensuring robust data storage solutions.
- Skilled in developing insightful data visualizations with tools like Tableau, Power BI, and Excel to support decision-making, along with conducting UAT and tracking key performance indicators (KPIs).
- Extensive experience with large-scale databases including MySQL, MongoDB, and Microsoft SQL Server, specializing in database design, optimization, querying, and performance tuning, coupled with expertise in statistical analysis and predictive modeling.

SKILLS

Methodologies:	SDLC, Agile, Waterfall
Programming Language:	Python, SQL, R
Packages:	NumPy, Pandas, Matplotlib, SciPy, Scikit-learn, TensorFlow, Seaborn, Plotty
Visualization Tools:	Tableau, Power BI, Advanced Excel (Pivot Tables, VLOOKUP)
IDEs:	Visual Studio Code, PyCharm, Jupyter Notebook, IntelliJ
Database:	MySQL, Redis, MongoDB, Microsoft SQL Server, PostgreSQL, Teradata
Cloud Technologies:	AWS (EC2, RDS, S3), Microsoft Azure
Tracking Tools:	Jira, Microsoft Visio, JAD, Rational ClearQuest, RTM, UAT
Other Technical Skills:	Google Analytics, DAX, Power Query, ETL Tools, Alteryx, SAS, JIRA, SAP, SSIS, SSRS Machine Learning Algorithms, Probability distributions, Confidence Intervals, ANOVA, Apache Spark, Apache Hadoop, Apache Kafka, Hypothesis Testing, Regression Analysis, Linear Algebra, Advance Analytics, Data Mining, Data Visualization, Data warehousing, Data transformation, Data Storytelling, Association rules, Clustering, Classification, Regression, A/B Testing, Forecasting & Modelling, Data Cleaning, Data Wrangling, Critical Thinking.
Operating Systems:	Windows, Linux, Mac OS

EDUCATIONS

Master of Science in Data Science

NJIT, New Jersey USA.

Bachelor of Technology in Biotechnology

JSS SCIENCE AND TECHNOLOGY, MYSURU, INDIA.

EXPERIENCE

Data Analyst | Montefiore Medical Center, NY, USA | Jan 2025– Present

- Generated and analyzed comprehensive monthly and annual reports on radiology operations, identifying key performance trends and providing actionable insights to address underperformance across multiple healthcare facilities.
- Leveraged **machine learning models** and AI-driven analytics to predict **patient no-shows using Epic EHR data**, improving scheduling efficiency and reducing appointment gaps across multiple radiology locations.
- Collaborated with financial teams to develop budgets, establish Relative Value Units (RVUs), and design incentive structures, including bonus allocations, to align physician and staff performance with healthcare organizational goals.
- Utilized **Python**, to perform advanced data analysis, create dynamic dashboards, and track key healthcare metrics (e.g., turnaround times, procedure volumes) to optimize 60% radiology department performance.
- Applied **PostgreSQL** to manage, query, and optimize large-scale relational databases, ensuring efficient data extraction and storage for radiology performance analysis and reporting.
- Conducted in-**depth analysis** to identify operational inefficiencies within the radiology department, particularly during periods of low performance or decreased procedural volume, providing 42% data-driven recommendations.
- Developed interactive dashboards in **Power BI** to provide 61% real-time insights and trend analysis, enabling better

decision-making and performance tracking across the radiology department.

- Enforced **Epic certification** expertise to streamline data workflows, integrate new healthcare systems, and optimize reporting processes, ensuring smooth operational continuity and data accuracy within the radiology department.
- Ensured all **data handling** and reporting processes adhered to **HIPAA** regulations, maintaining the confidentiality and security of patient information while optimizing 43% operational performance and reporting.

Data Analyst | Johnson & Johnson, NJ USA | Sep 2023 –Dec 2024

- Successfully led multiple data analysis projects using Agile methodologies, achieving a 30% improvement in project delivery timelines. By conducting regular sprint reviews and incorporating continuous feedback loops.
- Designed interactive dashboards and reports in **Power BI**, utilizing advanced features like slicers, filters, and calculated columns to provide healthcare professionals with intuitive drill-down and selection options.
- Integrated Python libraries such as **NumPy**, **Pandas**, to generate customized visualizations for better data insights and patient care optimization.
- Regularly monitored healthcare Key Performance Indicators (**KPIs**), enabling healthcare organizations to track quality measures, detect 41% deviations from clinical targets, and implement corrective actions to enhance patient outcomes.
- Consolidated and processed large volumes of healthcare data **from AWS Cloud**, internal EHR systems, and external public health databases using complex SQL queries, achieving a 25% reduction in data processing time and enabling quicker access to critical health information.
- Conducted **A/B testing** on patient engagement strategies and created predictive models for patient readmission risk, leading to a 20% improvement in patient retention rates.
- Utilized **SQL Server** Integration Services (SSIS) to automate ETL processes, efficiently extracting healthcare data from various systems, transforming it to align with 40% clinical and operational standards, and loading it into data warehouses.
- Applied **machine learning algorithms** and statistical techniques such as regression analysis, clustering, classification, and anomaly detection to healthcare data, uncovering 19% valuable insights related to patient outcomes, disease prevalence.

Data Analyst | Capgemini, India May 2019 – Aug 2022

- Spearheaded data analysis projects, focusing on optimizing business operations and improving decision-making processes by developing data-driven insights that aligned with the organizations strategic.
- Followed a comprehensive, **structured approach** to data analysis projects, encompassing all phases planning, requirements analysis, design, implementation, testing, and maintenance.
- Automated risk assessment models using **Python**, leading to increase in accuracy for credit scoring and risk evaluations.
- Spearheaded the optimization of investment portfolio analysis by implementing advanced numerical computations using **NumPy**, improving the precision of risk assessment models by 25%.
- Improved and deployed machine learning models using **Scikit-learn** for fraud detection, achieving a 30% increase in the identification of fraudulent transactions.
- Created dynamic, real-time trading dashboards in **Tableau**, allowing traders to visualize market trends and key performance indicators effectively.
- Optimized financial data storage and retrieval by implementing efficient indexing and query optimization techniques in MySQL.
- Optimized **ETL processes** to streamline data extraction, transformation, and loading into the financial data warehouse, achieving a 40% reduction in data processing time.
- Integrated **Apache Kafka** to establish real-time data streaming pipelines, facilitating faster data ingestion, and processing.
- Utilized **Seaborn** to create detailed correlation heatmaps, providing deeper insights into customer behavior patterns.
- Automated the aggregation and analysis of financial data using **advanced Excel** functions, such as Pivot Tables and VLOOKUP. These automations reduced the time required for financial reporting by 35%.
