

Adithya Chittajallu - Machine Learning Engineer

Kansas City , MO | +1 (816) 522-2153 | adithyachittajallu1@gmail.com | [LinkedIn](#)

Professional Summary

Results-driven Machine Learning Engineer with over 4 years of experience designing, developing, and deploying AI solutions across diverse industries. Skilled in using TensorFlow, PyTorch, and AWS SageMaker for deep learning and cloud-based model deployment. Strong background in MLOps with Docker, Kubernetes, and CI/CD pipelines, driving efficiency and automation in production environments. Experienced in collaborating with cross-functional teams and applying data-driven insights to solve complex business challenges.

Technical Skills

Programming: Python, MATLAB, R

ML Frameworks: TensorFlow, PyTorch, Keras, Scikit-learn, Hugging Face, OpenCV

Cloud Platforms: AWS, Azure, Google Cloud, IBM Cloud

MLOps/DevOps: Docker, Kubernetes, Kubeflow, MLflow, Jenkins, Apache Airflow, CI/CD

Databases: MySQL, MongoDB, PostgreSQL

Version Control: Git, GitHub, Bitbucket, GitLab

AI Domains: NLP, Computer Vision, Time-Series Forecasting, Reinforcement Learning

Tools: Jupyter Notebooks, Apache Kafka, ROS

Methodologies: Agile (Scrum, Kanban), Waterfall

Work Experience

Cyrvana

Machine Learning Engineer

United States

Aug 2024 – June 2025

- Developed a predictive analytics platform with AWS SageMaker, cutting inventory costs by 20% and improving demand forecasting by 25%.
- Implemented a computer vision quality control system using CNNs and OpenCV, reducing defect rates by 30%.
- Designed a dynamic pricing reinforcement learning model with TensorFlow, increasing sales revenue by 15%.
- Built an automated MLOps pipeline with Kubeflow, reducing model update times and ensuring stable production performance.
- Enhanced chatbot functionality using Hugging Face Transformers, increasing engagement and satisfaction by 40%.
- Reduced deployment setup times by 50% through Docker containerization of machine learning models.
- Conducted A/B testing in Jupyter Notebooks, iterating models to improve user experience.

Magna Infotech

Machine Learning Engineer

India

Jan 2021 – Aug 2023

- Developed a healthcare analytics solution with Scikit-learn, achieving a 30% improvement in treatment accuracy and resource management.
- Engineered a BERT-based NLP model for customer feedback analysis, boosting sentiment analysis accuracy by 25%.
- Built a collaborative filtering recommendation system in Python, increasing user engagement by 25%.
- Reduced fraudulent claims by 20% with a LightGBM-based fraud detection system for an insurance provider.
- Enhanced security monitoring using Keras computer vision algorithms, reducing false alarms by 15%.
- Automated deployment processes using Kubernetes and Azure DevOps, enabling seamless CI/CD pipelines.
- Developed a predictive maintenance system for smart home devices with Apache Kafka, minimizing device downtime.

Project Highlights

Supply Chain Optimization: Developed with AWS SageMaker, reducing inventory costs (20%) and improving demand forecasting (25%).

Healthcare Analytics: Built with Scikit-learn, improving treatment accuracy and resource allocation (30%).

Sentiment Analysis: Engineered using BERT, boosting sentiment analysis accuracy (25%).

Recommendation System: Built using collaborative filtering, increasing engagement (25%).

Dynamic Pricing Model: Designed with reinforcement learning (15% sales growth).

EDUCATION

Master of Science in Computer Science

University of Missouri

Aug 2023 – May 2025

USA

Bachelor of Technology in Information Technology

SRKR Engineering College

Jun 2019 – May 2023

India
