

Aditi Bondugula

Washington, DC | 571-354-9756 | aditireddy40@gmail.com

Personal Summary

Analytical undergraduate student with experience in risk analytics, automation, and predictive modeling across government, industry, and research. Skilled in building data pipelines, low-latency systems, and quantitative models to support real-time decision-making. Proficient in Python, SQL, UiPath RPA, and statistical methods such as Monte Carlo simulation and Bayesian inference. Adept at translating unstructured data into actionable insights, streamlining enterprise workflows, and applying advanced modeling to finance, healthcare, and emerging technologies like quantum computing.

Education

University of Connecticut - Storrs, CT

B.S. in Quantitative Economics (GPA: 3.9)

Expected Graduation: May 2026

Work Experience

Department of Defense - Washington, DC

Summer Intern | May 2025 - Aug 2025

- Built a high-frequency "human capital order book" in HTML/CSS with automated SharePoint integration via UiPath RPA.
- Engineered low-latency automation pipelines that cut project manager lookup time by 80%.
- Converted unstructured personnel data into a centralized, queryable database.
- Trained in enterprise finance workflows including O2C, P2P, Cost Accounting, and G-Invoicing.

Key Skills: Real-Time Data Automation, UiPath RPA, HTML/CSS, Low-Latency Pipeline Design, SharePoint Integration, Process Optimization, Enterprise Finance Systems

Advek Solutions - Remote

Risk Analytics Intern | May 2024 - Aug 2024

- Enhanced a risk management platform with Python modules for VaR and CVaR.
- Integrated Monte Carlo simulation and stress-testing frameworks, reducing run-time by 35%.
- Built SQL-driven data pipelines for historical price, volatility, and macroeconomic datasets.
- Collaborated with senior analysts on factor-based risk models.

Key Skills: VaR, CVaR, Monte Carlo Simulation, Stress Testing, Factor Modeling, Python, SQL, Portfolio Risk Analytics, Market Scenario Analysis

Yale School of Medicine - New Haven, CT

Computational Neuroscience Research Assistant | Aug 2022 - May 2023

- Engineered a Bayesian Neural Network to forecast Alzheimer's progression.
- Applied Bayesian inference, Monte Carlo simulations, and stochastic gradient descent.
- Developed scalable Python pipelines for neuroimaging and clinical datasets.
- Delivered statistically robust predictions with measurable confidence intervals.

Key Skills: Bayesian Neural Networks, Probabilistic Modeling, Bayesian Inference, Python, Statistical Model Validation

Leadership Experience

Quantum Computing Club - University of Connecticut

Member | 2022 - 2026

- Developed and tested quantum algorithms in Qiskit and IBM Quantum Experience.
- Built Python simulations benchmarking quantum vs. classical models.
- Contributed to a quantum-enhanced portfolio optimization project.

Key Skills: Qiskit, IBM Quantum Experience, Quantum Algorithms, Python, Optimization Modeling, Cryptography Applications

Skills & Interests

Technical Skills: Python | SQL | R | MATLAB | SAS | Java | JavaScript | TypeScript | Salesforce | Excel

Interests: Financial Modeling, Risk Analytics, Quantum Computing, Automation
