SUMMARY

Results-driven Computer Science graduate student with hands-on experience in Full Stack Development (C#, .NET, Angular, SQL) and data-driven application design. Proven ability to engineer scalable web solutions integrating AI/ML insights and analytics dashboards. Strong background in software engineering, automation, and performance optimization using Agile and CI/CD practices. Skilled in translating complex business needs into efficient, user-centric digital products.

EDUCATION

- Syracuse University, Syracuse, NY** **August 2024 – May 2026**
MS in Computer Science
Coursework: Machine Learning and Algorithms | Design and Analysis of Algorithms | Computer Architecture | Data Science Applications, Artificial Intelligence
- University of Mumbai, Mumbai, Maharashtra, India** **May 2020 – May 2024**
Bachelor Of Science in Computer Engineering
Coursework: Data Structures and Algorithms | Database Management System | Real-time Operating Systems

EXPERIENCE

- AI&ML Intern – Mumbai, India** **June 2022 – May 2024**
 - Built and optimized supervised & unsupervised models (regression, classification, clustering, decision trees) leading to >20% improved predictive performance
 - Applied NLP techniques on 10,000+ product reviews, enhancing marketing strategies and increasing user satisfaction by 25%.
 - Engineered sentiment classification pipelines and fine-tuned models using neural networks.
- Linux Systems Administration Intern – Cisco, India** **June 2021 – June 2022**
 - Gained hands-on experience in Linux command-line tools, network configuration, and system file management.
 - Automated routine operations using Bash scripting, improving task efficiency by 40%.
 - Installed and managed packages, resolved system-level issues, and ran SQL queries for data checks.

PROJECTS

- IntelliMeds – AI-Powered Prescription Safety & Drug Interaction System** **June 2023 – May 2024**
 - Trained Random Forest and BERT-based models on open FDA drug datasets to predict adverse medication interactions with 94% accuracy.
 - Built REST APIs using .NET Core for data retrieval and FastAPI for AI model serving — seamlessly connecting clinical dashboards with predictive insights.
 - Designed a responsive Angular interface for doctors to view risk scores, safe alternatives, and alerts in real time.
- CityPulse AI – Smart Urban Data Platform with Predictive Analytics** **June 2022 – May 2023**
 - Developed an AI-driven clinical support system that analyzed patient prescriptions and predicted harmful drug interactions with 94% accuracy, reducing medication errors by 38% in pilot tests.
 - Built scalable REST APIs in .NET Core and FastAPI to connect the predictive ML model with the hospital dashboard, ensuring results in under 2 seconds per query.
 - Designed an Angular-based dashboard for clinicians to visualize safe alternatives and alerts, improving response efficiency by 45%.

TECHNICAL SKILLS

Languages: Python, C#, SQL, JavaScript, TypeScript, HTML, CSS

Frameworks & Libraries: .NET Core, Angular, FastAPI, TensorFlow, Scikit-learn

Databases: SQL Server, PostgreSQL, MySQL, MongoDB

Tools & Platforms: Visual Studio, Power BI, GitHub, Docker, Azure, Jupyter, Postman

Concepts: Full-Stack Development, REST API Design, Machine Learning, NLP, Time-Series Forecasting, CI/CD
