EXPERIENCE

Student Research Assistant, TAMU School of Public Health

August 2023 - December 2024

- Contribute to a novel secret shopper survey of ACA marketplace networks, evaluating consumer experience and health disparities within provider networks to ensure client success.
- Demonstrate exceptional oral and written communication abilities to effectively articulate research findings and document consumer experiences.
- Utilize strong research skills to execute data collection efforts for comprehensive insights, ensuring accuracy and attention to detail

Social Media Marketing Team, TAMU School of Medicine

January 2024 - December 2024

- Demonstrated connections and art through social media platforms through the use of Canva, procreate, and other graphic design tools to create content for the Texas A&M School of Medicine. I have been able to refine other skills as well as my writing when I write for newsletters, photography with the DSLR camera for events, and much more.

CVS Pharmacy, Pharmacy Intern

August 2022 - December 2022

- Under the diligent guidance of a pharmacist, I proactively administered exceptional care to numerous patients, skillfully managing high volumes of customer traffic at the drive-through lines. My dedication to efficiency resulted in successfully checking out an average of 50 patients per day at the front desk and accurately filling out over 200 medication orders weekly. Additionally, I acquired comprehensive expertise in navigating various health insurance plans and their policies, contributing to seamless patient interactions and satisfaction.

PROJECTS AND OTHER

Medical City Hospital, Volunteer

June 2023- Present

- Helped guide patients and their families, providing support by assisting medical staff in various tasks, including ensuring patient comfort during blood work in the lab, offering refreshments, and providing gentle care to newborns in the NICU. Continuously fostering a nurturing environment, contributing to enhanced patient experiences, and positively impacting the well-being of those under our care.

Medical City Hospital, Shadow

- The ability to shadow orthopedic surgeon, Dr. Adam Green for many surgeries and how his role changed in the clinic. I saw the role of major healthcare workers in the operating room including the RN first assistant, the surgical PA, the CRNA, and many more. This allowed me the opportunity to be around a team of various health care workers allowing me to understand which role is vital to each individual.

Gaining Equity & Training for Public Health Informatics and Technology Camp, Scholar

June 2023 - July 2023

- Developed insights into public health trends by utilizing technology during an immersive program at UT Health Houston. Leveraged the power of Tableau, Excel, and advanced machine learning techniques to meticulously analyze vast datasets, culminating in a dynamic presentation that showcased data-driven solutions and innovations to address critical public health challenges.

Certification; FEMA

September 2024 -Present

- FEMA Certified in Emergency Management

Federal Emergency Management Agency (FEMA) – 2024

Courses include: IS-100.C (Introduction to the Incident Command System), IS-700.B (National Incident Management System), IS-200.C, and other relevant training in disaster response, emergency planning, and public safety.
