

Aditya Girish Mogadpally

Business Intelligence | Data Analyst

(508) 319 -1918 | adityamogadpally264@gmail.com | [LinkedIn](#) | [GitHub](#)

Professional Summary

- Results-driven Business Intelligence & Data Analyst with 3+ years of experience delivering scalable analytics solutions.
- Proven expertise in Power BI, Tableau, SQL, Python, and cloud data ecosystems (AWS, Azure, Snowflake).
- Skilled at designing KPI dashboards, building ETL workflows, and enabling predictive insights for supply chain, procurement, and inventory optimization.
- Adept at data modelling, governance practices, and advanced SQL to drive reporting automation and operational efficiency.
- Experienced in partnering with cross-functional teams to deliver data-driven recommendations improving cost, forecast accuracy, and SLA adherence.
- Strong background in data visualization, predictive analytics, and reporting standardization for enterprise-scale datasets.
- Committed to continuous learning with exposure to dbt, Airflow, Big Query, and advanced analytics workflows.
- Certified in Lean Six Sigma and Project Management, ensuring disciplined project execution and measurable impact.

Technical Skills

Data Visualization & Analytics: Power BI, Tableau, Looker, Advanced Excel (Power Query, PivotTables), Matplotlib, Seaborn

Database & Query Optimization: SQL (Snowflake, PostgreSQL, SQL Server, MySQL, Redshift), DBT, Big Query

ETL & Data Integration: Python (Pandas, NumPy, Airflow), AWS Glue, Fivetran, APIs

Cloud Platforms: Microsoft Azure, AWS, Snowflake, Amazon Redshift, Google Big Query, Azure Synapse

Machine Learning (Basic Models): Linear Regression, Logistic Regression, Time Series Forecasting (ARIMA)

Version Control & Project Management: Git/GitHub, Jira, Confluence, Agile Scrum CI/CD collaboration workflows

Professional Experience

Wayfair, USA | Business Intelligence Analyst

Sep 2024 – Present

- Designed and deployed enterprise-grade dashboards in Power BI and Tableau, enabling executives to monitor logistics KPIs, inventory flow, and SLA adherence, saving ~\$120K annually by reducing expedited shipping costs.
- Collaborated with cross-functional business units to gather reporting requirements, translating complex operational needs into BI specifications and dashboards that reduced ad-hoc requests by 35%.
- Engineered complex SQL models on Snowflake and PostgreSQL to forecast SKU demand, pre-empting supply risks and reducing emergency procurement by 15%.
- Automated end-to-end ETL pipelines using Python, Airflow, and AWS Glue, reducing manual reporting time by 45% and eliminating data-refresh errors.
- Built alert mechanisms and dynamic filters for late shipments & anomalies, reducing SLA penalties by ~8% per quarter.
- Developed and maintained data dictionaries and dashboard playbooks to ensure scalability across teams.
- Conducted root-cause analysis on delivery failures, achieving a 12% improvement in on-time shipments.
- Optimized Snowflake warehouse clustering and caching, cutting query latency by 30%.
- Implemented data partitioning strategies in AWS S3 buckets for cost-efficient storage and retrieval.
- Partnered with finance teams to quantify cost impacts of delayed shipments and recommended process changes saving \$50K quarterly.
- Championed A/B testing on logistics workflows, influencing policy updates with data-driven evidence.

Johnson & Johnson, USA | Data Analyst Co-Op

Jan 2024 – Jul 2024

- Built and deployed 9+ interactive BI dashboards in Power BI, allowing procurement leaders to drill into \$5M+ monthly spend and cut underperforming vendor contracts, saving ~\$75K annually.
- Performed in-depth ad-hoc data analysis using SQL and Python to identify spend anomalies, leading to renegotiation with 3 vendors.
- Developed ETL workflows using dbt and Fivetran to integrate supplier and warehouse data, increasing pipeline efficiency by

- 20%.
- Partnered with engineering to set up data lineage tracking in Azure Synapse, ensuring audit readiness and data reliability.
- Consolidated 50+ fragmented reports into a centralized Power BI data model, reducing redundant reporting by 60% and saving 120 hours/month.
- Designed predictive logistic regression models for supplier reliability scoring, improving supplier selection accuracy by 15%.
- Generated SQL-based KPI frameworks for procurement metrics across multiple warehouses, reducing manual reconciliation errors by 30%.
- Standardized naming conventions and schema documentation, improving cross-team onboarding speed.
- Conducted deep-dive spend analysis to highlight SKU-level inefficiencies, influencing category-wide budget reallocations.
- Created trend reports for stakeholders, presented insights in monthly executive reviews to shape sourcing strategy.

Aplus Datalytics, India | Data Analyst

Dec 2019 – Jul 2022

- Designed and deployed multi-source ingestion pipelines with AWS Lambda & S3 for automated data capture from 12 regional sales platforms, reducing manual extraction costs by ~\$20K annually.
- Built segmentation models using Python (Pandas/Scikit-learn) to identify high-value retail customers, increasing marketing ROI by 22%.
- Developed real-time Power BI dashboards for prescription trend analysis, enabling pharmaceutical stakeholders to adjust distribution channels and reduce overstock costs by \$35K per quarter.
- Implemented time-series forecasting models (ARIMA) for prescription and sales trends, improving demand-planning accuracy by 18%.
- Migrated historical sales data to Azure Data Lake Storage Gen2, enabling scalable analytics and secure archival.
- Designed custom SQL stored procedures for optimized data aggregation, decreasing query runtime from 10 minutes to under 2 minutes.
- Conducted data quality audits, identifying duplicate SKUs and saving inventory teams ~\$10K in wasted procurement annually.
- Provided detailed KPI insights to marketing teams, informing price elasticity decisions for top-performing products.
- Streamlined ETL workflows using AWS Glue jobs and event triggers, reducing refresh delays by 25%.
- Delivered executive-level visualization decks that influenced strategic investment in new distribution channels.

Education

Masters in Engineering Management	Dec 2024
Northeastern University, USA	
Bachelors in Computer Science & Engineering	May 2022
Vishwakarma Institute of Technology, India	

Certificates

Certified Associate in Project Management
Lean Six Sigma
