EDUCATION

DUKE UNIVERSITY, The Fuqua School of Business Master of Science in Quantitative Management: Business Analytics, Strategy Merit Scholarship; selected Admission Ambassador and Duke Innovation & Entrepreneurship Ambassador	Durham, NC May 2025
ANNA UNIVERSITY, Easwari Engineering College Bachelor of Engineering, Mechanical Engineering Ranked first of 200 in major, Academic Excellence Award, Elected Vice-President, Society of Mechanical Engineers; Head Creation & Content Chair, ISHRAE	Chennai, India Jun 2024

EXPERIENCE

LOS ANGELES FOOTBALL CLUB – Technical Consultant - Engineered features from 900K+ records across six datasets using Python and SQL, resolving data quality issues and unifying attendance, pricing, and resale information to support seat-level predictive analytics. - Developed and fine-tuned Random Forest classification model (93% accuracy, 0.88 F1-score) to predict scan likelihood per ticket, using variables such as historical attendance, resale activity, and pricing. - Developed two-tier ticket oversell strategy by combining modeling predictions with historical fan behavior patterns, allowing 60% of seat inventory to be safely oversold, maximizing stadium utilization. - Built Tableau Dashboard (heatmap) and section-level analysis for dynamic seating and ticketing operations.	Durham, NC Feb – Apr 2025
DUKE ADVANCED DEGREE CONSULTING CLUB – Consultant - Led team of five on strategic consulting engagement, orchestrating project for Fortune 250 client. - Conducted comprehensive market research, product analysis, customer segmentation, and competitive benchmarking using advanced Excel and Tableau, identifying a \$40M market expansion opportunity. - Developed and delivered data-backed recommendations via PowerPoint presentations and presented directly to executive-level client stakeholders, resulting in 93% client satisfaction.	Durham, NC Jan – Mar 2025
RECOTREE TECHNOLOGY SOLUTIONS PVT. LTD. – Data Analytics Intern - Queried and joined supply chain datasets using SQL and performed EDA in Python using Pandas and NumPy to uncover inefficiencies across suppliers, supporting optimization with actionable insights. - Built predictive models for demand forecasting and supplier reliability, reducing inventory costs by 12%; conducted A/B testing on marketing strategies that improved conversion rates by 14%. - Designed and delivered Tableau and Excel dashboards to track KPIs, accelerating reporting workflows.	Chennai, India Nov – May 2024
HOFINSOFT TECHNOLOGIES PVT. LTD. – Data Analytics Intern - Built and presented inventory analytics dashboard in Tableau to leadership, cutting manual reporting time in half; generated insights to inform executive decision-making. - Cleaned and transformed raw inventory datasets using Excel and SQL, improving data accuracy by 15%.	Chennai, India Jun – Jul 2023

TECHNICAL SKILLS

Python (Pandas, Numpy, Matplotlib), R (tidyverse, dplyr, ggplot2), SQL, Tableau, Advanced Excel (Pivot Tables, VLOOKUP), A/B Testing; Data Cleaning, Predictive Modeling, Regression Analysis, SWOT & PESTLE Analysis, Market Research, Competitive Analysis
Certifications: Google Data Analytics Professional Certification, Coursera; Six Sigma White Belt Certification, C.S.S.C

PROJECTS

Driving User Insights and Retention for Dognition (SQL). Cleaned, joined, and normalized data across six-table relational database using SQL, resolving duplicates, NULLs, and key mismatches. Conducted EDA to uncover behavioral trends and subscription lifecycle patterns for the platform. Generated insights to refine product features and enhance customer retention.

Healthcare Data Analytics & Interactive Dashboard (Tableau). Designed Tableau dashboard analyzing patient visits, resource use, and ICD-10 patterns with dynamic views by demographics and provider efficiency. Cut reporting time by 40% and improved care visibility. Integrated prescription data and applied forecasting to predict seasonal demand, optimizing planning and staffing.

Strategic Consulting for Tarte Cosmetics (Market Research, Strategy). Researched market and applied environmental scanning and Porter's Five Forces to evaluate Tarte's entry into clean toiletries market; developed go-to-market strategy using frameworks like first-mover advantage, CLV, and economies of scale, projecting 3% market share and \$30M in revenue within three years.

Modeling and Analyzing Spotify Hits (Machine Learning). Built machine learning models like logistic regression and random forest to classify Spotify hits, uncovering marketing insights to boost promotion strategies. Analyzed 20K+ songs and applied PCA to extract key audio features like loudness and acousticness, driving data-informed decisions in song production and targeting.
