PROFILE

Backend Developer with proven expertise in Python and PHP, skilled in designing and optimizing secure, scalable REST APIs. Experienced in integrating third-party services and managing data storage across relational and NoSQL databases. Developed robust web applications with a focus on performance tuning and security enhancements. Prepared to leverage backend expertise to support real-time platforms and enhance system efficiency.

EDUCATIONAL BACKGROUND

Wright State University

Masters, CyberDefense

• GPA: 3.5

Jan 2024 - Present

Islington College

Bsc Hons, Computing

2018 - 2021

PROFESSIONAL EXPERIENCE

Becton Enterprises, LLC

Python Prompt Engineer

May 2025 - Aug 2025

Dayton, OH

Engineered AI prompt systems and built secure automation tools during my internship at Becton Enterprises, deploying Python-based frameworks that enhanced system scalability and automation efficiency while ensuring secure data handling across internal workflows.

- Designed and refined AI prompts using Python to improve language model accuracy and optimize task outcomes.
- Streamlined testing and increased accuracy by automating workflows and monitoring performance with custom Python scripts.
- Collaborated with cross-functional teams to implement prompt-based solutions in real-world scenarios, resulting in improved system integration and higher user satisfaction.
- Applied few-shot and chain-of-thought prompting techniques to enhance AI reasoning and reliability, yielding more accurate and dependable AI outputs.

Quality IT Solution

Back End Developer

Jul 2021 - Dec 2023

Kathmandu, Nepal

- Developed secure and scalable web applications using Laravel, PHP, and MySQL, incorporating RESTful API design to support frontend integrations and agile workflows for maintainable code.
- Integrated third-party services such as payment gateways (PayPal, Stripe) and external APIs (Google Maps, SMS gateways) to expand application functionality.
- Implemented robust authentication and access control mechanisms (OAuth, JWT, RBAC) while optimizing database performance through indexing, query optimization, and normalization, aligning with best practices in backend security and performance tuning.
- Deployed and managed applications on Linux-based servers (Apache/Nginx), ensuring high availability, enhanced security, and system reliability.

Pagoda Labs

Laravel Developer

Jun 2020 - May 2021

Kathmandu, Nepal

- Developed and maintained high-performance web applications using Laravel, designing scalable RESTful APIs and implementing secure authentication mechanisms (Laravel Passport, JWT) to facilitate seamless API integration.
- Optimized database structures and queries, enhancing application performance and promoting code reusability through customized Laravel packages.
- Troubleshoot and resolved complex technical issues in collaboration with frontend developers, ensuring smooth API integration and an optimal user experience.

Bajra Technologies Pvt. Ltd.

Python Odoo Developer

Mar 2020 - Jun 2020

Kathmandu, Nepal

- Gained hands-on experience with the Odoo Python Framework by working on ERP development and module customizations to meet diverse business requirements.
- Assisted in integrating and customizing business management solutions, tailoring ERP functionalities to specific organizational needs while leveraging agile workflows.
- Developed automation scripts to streamline workflows, reduce manual effort, and enhance overall operational efficiency.

Islington College, Kathmandu

Teaching Assistant

Dec 2019 - Mar 2020

Kathmandu, Nepal

- Conducted interactive lab sessions and tutorials for Information Systems and Database Management, guiding students through practical applications, troubleshooting technical issues, and reinforcing key concepts.

- Assisted in developing course materials and evaluation frameworks, contributing to lecture content, assignments, and grading rubrics to enhance student learning and assessment accuracy.
- Led a team in designing and prototyping a student management system, streamlining administrative tasks by automating record-keeping and performance tracking for junior teaching assistants.

PROJECTS

Famkal Stores

- <https://famkalstores.com/>

Pathibhara Construction Pvt Ltd

- <https://www.pathibharaconstruction.com/>

Pashupati Nursery Php Project

SKILLS

- **Programming Languages:** Python, PHP, JavaScript
- **Cybersecurity:** Secure Web Development, AI in Security, Blockchain Security, Threat Analysis
- **Web & Backend Development:** Laravel, Odoo, REST APIs, AJAX, Database Systems
- **Tools & Platforms:** Git/GitHub, MySQL, Linux, Docker, OpenSSL, Agile Workflows, Cloud Deployment
- **Machine Learning & Data Analysis:** TensorFlow, Pandas, Scikit-learn
- **Quality & Testing:** Performance Tuning, Backend Security, Unit Testing, Integration Testing

HONORS AND AWARDS

- **Aspire 2018:** Recognized for outstanding performance in technology
