

ADITYA PATNAIK

(202) 702-8715 | abpatnai@syr.edu | <https://www.linkedin.com/in/abpatnaik/>

EDUCATION

Syracuse University | *MS -Information Management*

GPA: 3.84 / 4.00 Aug'16 – May'18

Selected Coursework: Data Mining, Applied Data Science, Statistics, Machine Learning, Databases, Business Analytics

College of Engineering, Bhubaneswar | *BS – Mechanical Engineering*

PROFESSIONAL EXPERIENCE

Ceres Nanoscience Inc. | *Data Analyst Intern*

Jan'17 – Aug'17

- Performed an **analysis** of the competitive environment, opportunities and costs to aid in product marketing efforts
- Applied **decision trees**, **Naïve Bayes**, **SVM** algorithms using **Python** for improving classification accuracy
- Built **logistic regression** models with dummy and interaction variables to aid in diagnosis of global health diseases
- Used **R** to implement **data imputation** techniques to handle missing data and **outliers** in large datasets

Gulshan Polyols Limited | *Junior Market Analyst*

Jan'16 – Jun'16

- Led a team to track and improve international product positioning efforts using **R packages** (**ggplot**, **dplyr**, **caret**)
- Applied **statistical methods** such as **regression** techniques and **time series analysis** to aid strategic marketing
- Scripted and executed complex **SQL** Queries to generate **actionable insights and trends** from customer database
- Led **SEO** and **A/B testing** efforts to optimize performance of online advertising campaigns and company website

Larsen and Toubro Limited | *Engineer Analyst*

Jul'13 – Mar'15

- Aided in planning, scheduling and optimizing project tasks and resources for a \$2 million project
- Communicated with clients and key- stakeholders to understand project scope, deliverables and milestones
- Conducted **ad-hoc quantitative analysis** to aid management and cross-functional teams in problem solving
- Generated scatterplots, bar charts, line graphs, **cluster segmentations** to identify patterns in the dataset
- Tracked management planning control systems using advanced **Excel** formulas and functionalities

PROJECTS

Applied Data Science - **Statistics | R | Predictive Modelling**

Aug'17 – Dec'17

- Analyzed Hyatt hotel's survey data consisting of a few million data points to improve their net promoter score
- Assimilated, cleaned and transformed data for conducting **descriptive** and **predictive analytics** on survey data
- Used **data visualization** packages to gain insights about the best and worst performing hotels within United States

Business Analytics –**Tableau | SQL | Excel**

Feb'17 – May'17

- Conducted **multivariate regression analysis** on a dataset consisting of over 200,000 observations to understand factors that influence weekly sales of sports drinks in upstate New York
- Used cross **database joins** and **SQL queries**, filtering and advanced calculation to prepare data for analysis
- Used Tableau to create interactive **dashboards** and **stories** to summarize findings for **non-technical audience**

Advanced Information Analytics – **Spark | Python | Machine Learning**

Aug'16 – Dec'16

- Used advanced **data mining** techniques to predict if a customer defaults on his **credit card bill** payment
- Implemented algorithms like **neural networks**, **random forest**, **gradient boosting**, **regressions**, **regularization**
- Compared performance of various models and **tuned hyperparameters** of each model to improve predictions

SKILLS

Scripting Languages: Python (NumPy, Pandas, SciKit-Learn, TensorFlow, Keras), R (ggplot,dplyr,glmnet)

Business Intelligence & Analytics: Tableau, Google Analytics, MS Excel, Weka

Databases: MySQL, PostgreSQL, MS Access, Redshift, EC2, S3(AWS)

Machine Learning Tasks: K-means clustering, KNN, Decision Trees, Random Forests, SVM, NLP
