Professional Summary

Data Analyst / Data Scientist with a B.S. in Data Science (Summa Cum Laude, GPA 4.0) and 2 years of professional experience at Yaqeen Technology in advanced analytics and machine learning. Skilled in Python, R, SQL, Tableau, AWS, and GCP with a proven ability to deliver predictive models, BI dashboards, and data-driven strategies that improve operational efficiency and business outcomes. Passionate about applying ML, time-series forecasting, and data visualization to real-world business and healthcare challenges.

Professional Experience

Yaqeen Technology Consultancy — Data Analyst

Remote / Tracy, CA | Sep 2024 – Present

- Led client-facing analytics projects in financial services and collections, delivering predictive models and BI dashboards.
- Designed propensity-to-pay and channel optimization models in Python (XGBoost, Random Forest) to improve collections strategy precision.
- Built time-to-contact models using survival analysis and time-series forecasting, aligning outreach windows with optimal consumer engagement.
- Developed and deployed SQL + Tableau dashboards for compliance, QA, and operational reporting, used by senior executives.
- Collaborated with cross-functional teams to productionize ETL workflows on AWS (S3, Lambda, Redshift, DynamoDB) and GCP (BigQuery).

Yaqeen Technology Consultancy — Data Analyst Intern

Remote / Tracy, CA | Sep 2023 – Aug 2024

- Designed and automated Tableau dashboards and Excel reports to monitor KPIs.
- Processed and transformed large datasets using ETL pipelines on AWS and GCP.
- Optimized SQL queries and reporting pipelines, reducing runtime by 60%.
- Assisted in predictive model development, improving forecasting accuracy for operational analytics projects.

Selected Projects (Portfolio @ affannauman.com)

- Best Channel to Communicate (Yaqeen Technology) – Built multi-class classification models (XGBoost, Random Forest) to recommend optimal channel (SMS, email, call); visualized results in Tableau to improve consumer engagement strategy.
- Best Time to Contact Consumer (Yaqeen Technology) – Applied time-series forecasting + survival analysis

to identify optimal contact windows, improving outreach success rates.

- Propensity-to-Pay Modeling (Yaqeen Technology) – Developed predictive models in Python/Scikit-learn to score likelihood of payment; used SQL + Tableau for actionable dashboards.
- Northwind Traders BI Analysis – Conducted large-scale BI analysis using SQL, Python, and GCP; visualized product/category performance trends in Tableau and Excel.
- Digital Darwinism Market Analysis (Kohl's Case Study) – Analyzed digital adoption gaps and customer behavior; delivered strategy recommendations for retail modernization.
- Heart Disease Risk Prediction (CDC BRFSS Data) – Performed statistical modeling and ML (Python, R, SQL) on CDC survey data; designed Tableau dashboards to inform public health decision-making.

Technical Skills

- Programming & Data Analysis: Python, R, SQL, Java, C++
- Machine Learning & AI: Scikit-learn, Pandas, NumPy, XGBoost, Random Forest, Logistic Regression, Survival Analysis, Time-Series Forecasting
- BI & Visualization: Tableau, Excel, Matplotlib, ggplot2
- Cloud & Big Data Tools: AWS (S3, Lambda, Redshift, DynamoDB, EC2), GCP (BigQuery, Dataflow)
- Other Tools: Git, Jupyter, VS Code

Education

Arizona State University (ASU), Tempe, AZ

Bachelor of Science in Data Science — Summa Cum Laude (GPA 4.0/4.0)

Graduated Aug 2025

- Coursework: Machine Learning, Statistical Modeling, Cloud Computing, Database Systems, Data Visualization

Certifications

- AWS Certified Cloud Practitioner — In Progress
