Professional Summary

Detail-oriented Data Scientist / Data Analyst with a B.S. in Data Science (Summa Cum Laude, GPA 4.0) and hands-on experience in data analysis, machine learning, and cloud platforms (AWS, GCP). Skilled in Python, R, SQL, Tableau, and Excel with a proven ability to design ETL workflows, predictive models, and KPI dashboards that drive business decision-making. Strong foundation in statistical analysis, big data processing, and business intelligence reporting.

Professional Experience

Yaqeen Technology Consultancy — Data Analyst Intern

Remote / Tracy, CA | Sep 2023 – Present

- Designed and deployed predictive ML models in Python and R, improving forecasting accuracy for internal analytics projects.
- Built and automated Tableau dashboards and Excel reports, delivering real-time insights on KPIs for senior stakeholders.
- Processed and transformed large datasets using ETL pipelines on AWS (S3, Lambda, Redshift) and GCP (BigQuery, Dataflow).
- Developed and optimized SQL queries to support business intelligence and reporting needs.
- Collaborated with engineers and analysts to deliver data-driven recommendations improving operational efficiency.

Key Projects

- Heart Disease Risk Prediction (Capstone): Applied Logistic Regression, Random Forest, and feature engineering on CDC BRFSS data; achieved high predictive accuracy for health risk modeling.
- Northwind Traders BI Analysis: Built SQL queries and Tableau dashboards to analyze sales, profitability, and product performance across categories; improved business decision-making visibility.
- Digital Darwinism Study: Researched digital transformation challenges for retail (Kohl's); delivered data-driven strategy recommendations for modernization initiatives.

Technical Skills

Programming & Data Analysis: Python, R, SQL, Java, C++

Machine Learning & Statistics: Scikit-learn, Pandas, NumPy, Logistic Regression, Random Forest, Statistical Modeling

Business Intelligence & Visualization: Tableau, Excel, Matplotlib, ggplot2

Cloud & Big Data Tools: AWS (S3, Lambda, Redshift, EC2), GCP (BigQuery, Dataflow)

Other Tools: Git, Jupyter, VS Code

Education

Arizona State University (ASU), Tempe, AZ

Bachelor of Science in Data Science — Summa Cum Laude (GPA: 4.0/4.0)

Graduated Aug 2025

- Transferred from UC Merced (Computer Science major)

- Coursework: Machine Learning, Statistical Modeling, Cloud Computing, Database Systems, Data Visualization

Certifications

AWS Certified Cloud Practitioner — In Progress
