Experience

Product Analyst

May 2024- Present

PennyMac Cary, NC

- Conducted comprehensive front-end testing and managed ticket workflows for the Consumer Direct Lending team, ensuring seamless functionality and user experience.
- Collaborated on backend data engineering initiatives, developing and maintaining robust data structures using PGAdmin, Snowflake, and SQL on the Core Data Engineering team.
- Rotated as Team Lead for Analyst class to help in sprint planning and retrospectives, helping to streamline the Agile development process and improve team productivity.

UX/UI Design Intern

August 2023- January 2024

Duke University Durham, NC

- Led user research for a 6-month project, resulting in 20% improved user satisfaction based on survey feedback.
- Developed interactive prototypes using tools like Sketch, Figma, or Adobe XD, enabling iterative design and user testing.

PR & Media Relations Intern

May 2023 - July 2023

Self-Help Credit Union Durham, NC

- Produced and directed an intern promotional video for organization use.
- Drafted compelling press releases, media alerts, and pitches that effectively communicated key messages and garnered media interest.
- Redesigned the media center portion of the organization's site using Miro and Figma.

Web Development Assistant

August 2022 – May 2023

UNC-Chapel Hill Hindi/Urdu Department

- Assisted in coding and testing website functionality using HTML, CSS, and JavaScript, contributing to the development of dynamic and interactive web pages.
- Conducted website content updates and maintenance, ensuring accuracy, consistency, and up-to-date information.

Software Engineering Intern

May 2022 - August 2022

Benesit, Barcelona, Spain

- Collaborated with senior engineers to develop and enhance software applications, contributing to successfully delivering key project milestones.
- Improved code efficiency by 15% by optimizing existing algorithms and refactoring outdated code, leading to faster application performance.
