EDUCATION

The University of North Carolina at Charlotte, College of Computing & Informatics

Charlotte, NC

Master of Science in Computer Science

Concentration: AI, Robotics, & Gaming

- Relevant Coursework: Applied AI, Intelligent Robotics, Software System Design & Implementation, Computer Communications & Networks, Intelligent Systems, Intelligent Robotics, and Algorithm & Data Structures

Bachelor of Science in Computer Science

Concentration: AI, Robotics, & Gaming

- Relevant Coursework: Applied Machine Learning, Algorithm & Data Structures, Database Design & Implementation, Computer Vision, Discrete Structures, Operating Systems & Networking, and Visual Analytics

SKILLS & CERTIFICATES

Programming/Technologies: Python (Scikit-Learn, TensorFlow, NumPy, PyTorch), SQL, MySQL, Java, C, C++, Assembly, PyCharm, Eclipse, NetBeans, IntelliJ IDEA, GitHub, AWS, Azure, Docker, & Microsoft Office

Certifications: Microsoft Azure Fundamentals, Azure Data Fundamentals, & Azure AI Fundamentals

PROFESSIONAL EXPERIENCE

UNC Charlotte's Advising Systems

Charlotte, NC

Data Management Assistant - Processing, Research, & Analysis

February 2024 – May 2024

- Analyzed and modeled student enrollment data with Navigate360 to optimize course offerings for 10,000+ students.
- Collaborated with the Executive Director to develop and implement new advising system initiatives.

RXO / XPO Logistics

Charlotte, NC

Network Engineer

May 2022 – December 2022

- Troubleshooted and resolved internet circuit issues for 250+ LTL, Last Mile, and Freight Brokerage sites, ensuring network stability and minimal downtime.
- Implemented a standardized router naming convention to improve management and identification.
- Installed Cisco equipment at data centers, contributing to network expansion and connectivity.

PROJECTS

AI SMS Spam Detection System

May 2024

- Created an SMS spam detection system using Support Vector Machines with 99.1% accuracy.
- Trained and evaluated the model using Python and Scikit-Learn.

Rapidly-Exploring Random Tree (RRT) Planner for Point Robot Navigation

May 2024

- Developed an RRT planner for a point robot navigating a 200x200 grid with obstacles with a 2D array.
- Successfully found collision-free paths in an average of 500 iterations, ensuring reliability.
- Visualized obstacles, the RRT tree, and the discovered path using MATLAB.

CollegeConnect Web Application

May 2024

- Designed and developed CollegeConnect, a web app for college student connections.
- Created a roommate finder utilizing various criteria for matching compatibility.
- Utilized Python with Flask framework, HTML/CSS, and SQL for database management.

Connect 4 Game (Player vs AI)

October 2023

- Designed and implemented a user-friendly GUI for a Connect Four game using Pygame.
- Integrated user-selectable AI algorithms (MiniMax and Alpha-Beta Pruning) for challenging gameplay.

LEADERSHIP EXPERIENCE

Club for A.I. Research (CAIR)

Charlotte, NC

President (2022-2023) / Vice President (2021-2022)

October 2021 – March 2023

- Led and organized weekly AI research-related activities for 200+ members to foster AI collaboration.
- Built partnerships with industry professionals and faculty in creating projects and workshops.
