

AFROZ MOHAMMAD

Full Stack .Net Developer | (208) 408 4413 |afrozmohammad435@gmail.com

Profile Summary:

- Full Stack .NET Developer with 4+ years of experience building scalable, cloud-native applications across healthcare and enterprise domains.
- Skilled in C#, ASP.NET Core (6/7/8), Angular (12-17), SQL Server, and Azure DevOps, with proven success in .NET 8 solutions.
- Experienced in SQL Server (2016-2022) and Oracle PL/SQL with expertise in writing stored procedures, triggers, views, and performance-tuned queries.
- Hands-on expertise with RESTful API design, JSON, Swagger (OpenAPI), and Postman for API testing and documentation.
- Strong understanding of Object-Oriented Programming (OOP) and design patterns (Repository, Unit of Work, Singleton, Factory, Dependency Injection).
- Implemented ETL pipelines with SSIS and developed enterprise reports with SSRS and Power BI, enabling business intelligence and analytics.
- Improved deployment cycles by 60% through CI/CD automation and optimized query performance by 30% using caching and SQL tuning.
- Enabled weekly production releases instead of monthly and delivered faster, more reliable data access for end-users.
- Experienced in Docker and Kubernetes for microservices deployment and containerized applications.
- Strong expertise in microservices, container orchestration (Docker/Kubernetes), and HIPAA/FHIR/HL7-compliant solutions.
- Skilled in Test-Driven Development (TDD) and Behavior-Driven Development (BDD) using xUnit, NUnit, Jasmine, and SpecFlow.
- Adept in Agile/Scrum methodologies, collaborating with cross-functional teams and participating in sprint planning, reviews, and daily stand-ups.
- Recognized for mentoring junior developers, conducting code reviews, and ensuring delivery of high-quality, maintainable code.

Technical Skills:

Programming & Scripting:

C#, ASP.NET Core (MVC/Web API), VB.NET, LINQ, ADO.NET, JavaScript, CSS, TypeScript, Angular (2-17), React.js, Node.js, JQuery, AJAX, HTML, CSS3, Bootstrap, JSON, XML, Python, PowerShell, C, C++, Java (Spring Boot)

Frameworks & Libraries:

.NET Framework (4.5-4.8), .NET 6/7/8 (Core & Framework), Entity Framework/EF Core (Database-First & Code-First), WCF, WPF, Blazor, Node.js, Unity Framework (Dependency Injection), Windows Workflow Foundation (WWF).

Databases:

SQL Server (2016/2019/2022), Oracle (12c/18c/19c/21c), MySQL, PostgreSQL, MongoDB

Cloud & DevOps:

Microsoft Azure (App Services, Functions, Storage, Data Factory, Key Vault, DevOps CI/CD), AWS (EC2, S3, Lambda, CloudWatch), GCP, Docker (Containerization), Kubernetes (Container Orchestration),

Terraform ,Jenkins, GitHub Actions, Azure DevOps, Git, TFS, SVN, CI/CD Pipelines, RabbitMQ, Microservices design & implementation with .NET Core, Monitoring & Logging (Prometheus, ELK Stack)

Data Integration & Reporting:

SSIS (ETL Pipelines), SSRS (Reporting Services), Power BI, Tableau, Crystal Reports

Testing & QA:

TDD/BDD (xUnit, MSTest, Jasmine, SpecFlow), NUnit, Karma, Selenium, SOAP UI, JUnit, Postman, Fiddler,

Web & UI Technologies:

Single Page Applications (SPA), Responsive Design, UI/UX Best Practices, RESTful APIs, SOAP Services, GraphQL (API development & integration).

Methodologies:

Agile (Scrum), Test-Driven Development (TDD), Waterfall (SDLC)

Tools & IDEs:

Visual Studio (2017/2019/2022), Visual Studio Code, SSMS, SQL Profiler, SQL Server Agent, NPM, MS Visio, MS Office Suite (Word, Excel, PowerPoint, Outlook, Project), SharePoint

Operating Systems:

Windows (7/8.1/10, Server 2016/2019/2022), Linux

Professional Experience:

CVS health, Dallas Tx | June 2024 – Present

Full Stack .Net Developer

- Designed and developed enterprise applications using C#, ASP.NET Core 8, MVC, Web API, and Entity Framework Core 8, delivering scalable and high-performing solutions.
- Built and maintained RESTful APIs with Swagger documentation and Postman testing, ensuring secure and reliable integration with distributed systems.
- Developed dynamic, responsive user interfaces using ASP.NET Core MVC (Razor Views), Angular 17, TypeScript, RxJS, NgRx, Bootstrap 5.3, and jQuery.
- Implemented modular and reusable UI components with Angular Modules, Angular Material, and Partial Views, improving maintainability and reducing development time.
- Optimized SQL Server and Oracle queries (T-SQL/PL-SQL, LINQ, AutoMapper, Redis caching), reducing query response time and improving database performance.
- Built ETL pipelines using SSIS and created SSRS reports with caching and subscriptions, enabling enterprise-wide data integration and reporting.
- Developed internal dashboards using Blazor components integrated with REST APIs for real-time data visualization.
- Designed and deployed microservices architecture with Docker, Kubernetes, and Azure App Services, enhancing scalability and reducing system maintenance overhead.
- Led continuous integration/continuous deployment pipeline automation in Azure DevOps, reducing deployment times by 60% and enabling weekly production releases instead of monthly.
- Applied secure authentication and authorization mechanisms (OAuth2, JWT, Azure AD, RBAC, HIPAA compliance) to protect sensitive healthcare data.
- Collaborated with data science teams to expose predictive analytics models via secure .NET APIs, supporting AI-driven clinical decision-making.
- Leveraged design patterns (Repository, Factory, Singleton, Dependency Injection) to ensure maintainable and testable code.
- Developed unit tests with xUnit/MSTest as part of TDD workflow, improving coverage and maintainability.

- Integrated third-party APIs and services through REST API integration, ensuring secure and seamless data exchange.
- Actively contributed to Agile delivery through sprint planning, backlog refinement, daily stand-ups, and client demos, ensuring timely and business-aligned releases.

Environment: C#, ASP.NET Core 8, ASP.NET MVC, Web API, Entity Framework Core 8, LINQ, Angular 17, Angular Material, TypeScript, RxJS, NgRx, Bootstrap 5.3, jQuery, HTML5, CSS3, SQL Server 2019/2022, PL/SQL, Redis, AutoMapper, SSIS, SSRS, Power BI, Swagger (OpenAPI), Postman, xUnit, MSTest, Docker, Kubernetes, Azure DevOps, Azure App Services, Azure Key Vault, Git/GitHub, JIRA, Visual Studio 2022, Visual Studio Code.

Terralogic , India | June 2021 –July 2023

Full Stack .NET Developer

- Designed and developed modern web applications using ASP.NET Core MVC (5/6/7), Web API, Entity Framework, and C#, delivering secure and scalable solutions.
- Integrated Angular 12–15 front-end applications with back-end APIs, building reusable components, responsive UIs, and SPA features using TypeScript, Angular CLI, Bootstrap, and JavaScript.
- Created and optimized SQL Server and Oracle database schemas, queries, and stored procedures, improving performance and reducing query response times by 25%.
- Implemented Repository Pattern and Unit of Work with Dependency Injection, ensuring modular, testable, and maintainable codebases.
- Developed and consumed RESTful Web APIs supporting CRUD operations with JSON handling, enabling seamless API-driven functionality across modules.
- Designed and implemented microservices architecture to ensure modularity, scalability, and simplified deployments on Azure Cloud.
- Built ETL workflows with Python and SSIS to automate data integration, transformation, and migration tasks, reducing manual effort by 50%.
- Contributed to data migration projects including Oracle-to-SQL Server migrations, ensuring accuracy and consistency of enterprise datasets.
- Implemented secure authentication and authorization using OAuth2, JWT, RBAC, Okta, and Azure AD, adhering to HIPAA and GDPR compliance standards.
- Applied Action Filters and Message Handlers to enforce pre-controller validation and cross-cutting concerns in ASP.NET Core applications.
- Developed functional modules such as Payments, Banking Activity, Alerts, and Push Notifications, delivering critical business functionality.
- Conducted unit and integration testing using NUnit, Jasmine, and Karma, ensuring software reliability and quality before deployment.
- Collaborated in Agile/Scrum environments with daily stand-ups, sprint planning, code reviews, and Git/GitHub-based version control for efficient project delivery.

Environment: C#, ASP.NET Core MVC (5/6/7), ASP.NET Web API, Entity Framework, LINQ, Angular 12–15, Angular CLI, TypeScript, JavaScript, jQuery, Bootstrap 4, HTML5, CSS3, SQL Server 2016, T-SQL, SSIS, SSRS, Python (Pandas), Azure Cloud, OAuth2, JWT, Azure AD/Okta, Postman, Jasmine, Karma, Git/GitHub, JIRA.

Caliber Technologies, India | Jan 2020 –May 2021

Jr. Full Stack .NET Developer

- Developed and maintained enterprise applications using ASP.NET MVC 5, C#, and Entity Framework (Database-First), ensuring scalable and maintainable architecture.

- Contributed to modernization by migrating legacy VB.NET modules into C#, improving performance, maintainability, and test coverage.
- Designed and optimized SQL Server schemas, stored procedures, and queries, achieving a 30% improvement in API response times.
- Implemented 3-Tier architecture with Repository and Unit of Work patterns for efficient and reusable data access.
- Built responsive UI components using jQuery AJAX, HTML5, CSS3, and Bootstrap, enhancing user experience and application interactivity.
- Collaborated in an Agile/Scrum environment with sprint planning, daily stand-ups, and retrospectives to ensure timely delivery.

Environment ASP.NET MVC 5, C#, Entity Framework (Database-First), ADO.NET, LINQ, SQL Server 2016/2017 (T-SQL, Stored Procedures, Triggers, Views), HTML5, CSS3, JavaScript, jQuery, Bootstrap 3.7, AJAX, Visual Studio 2017, Git, TFS, JIRA.

Education:

Master of Science in computer science | University of Central Missouri,
Warrensburg, MO
