EXPERIENCE

BAIN & COMPANY, Analyst Intern (Data & Insights Team)

Delhi, India

Jan - Jun 2024

- Led automation in Consumer Lab team, reducing survey analysis time from 2-3 weeks to 1 week via VBA.
- Developed advanced proficiency in Alteryx with Commercial Excellence team, driving projects in capability assessment diagnostics boosting client revenue by 2%.
- Consulted Fortune 500 clients on digital transformation initiatives, developing Tableau dashboards and detailed benchmarks that improved client feedback scores by 11%.
- Collaborated cross-functionally with Strategy and UX teams, and regularly presented insights and solutions to client teams during project check-ins.

CREDENC, Business Analyst Intern

Delhi, India

May - Aug 2023

- Led data analytics and technology strategy to track and optimize loan disbursal pipelines, integrating Power BI for executive reporting and reducing rejection rates by 17%.
- Compiled and studied 20 years of study abroad market data, uncovering insights increased study abroad client volume by 9%.
- Analysed competitors in education loan market using EDA, identifying new features to inspect third-party threats and driving a 0.03% increase in NBFC student loan market share.
- Worked across strategy and tech teams and presented data-driven recommendations to leadership to influence product decisions

WINSOME BIOCEUTICALS, Strategy Intern

Delhi, India

May - Jul 2022

- Analyzed multi-year sales data and built enterprise analytics dashboards in Tableau, driving insights on customer retention and digital performance for senior leadership.
- Developed and maintained reports to track customer engagement and retention KPIs, synthesizing daily actionable performance data from company website and social media platforms.

SELECTED PROJECTS

Analysing Thrift Savings Plan Participant Sentiment (Python, Tableau)

- Collected and analysed 2,000+ user comments from Reddit and Twitter to uncover pain points in the Thrift Savings Plan experience
- Built classification and sentiment models in Python to identify themes such as fund confusion, platform issues, and trust concerns
- Visualized insights in Tableau to help FRTIB prioritize platform improvements and enhance participant satisfaction

Analysing Airline Loyalty Program Customer Satisfaction (SQL, Tableau)

- Investigated how airline loyalty programs influence customer satisfaction across 6+ service areas using SQL
- Found significant satisfaction gaps favouring loyalty members, especially in onboard comfort and check-in experience
- Presented findings via Tableau dashboards to inform airline strategies on loyalty program design and service upgrades

Predicting Revenue: Analysing EV Market Dynamics (R)

- Explored the impact of macro factors (fuel price, GDP, EV adoption) on Tesla's revenue using regression and random forest models
- Identified key revenue drivers and built accurate forecasting models using R to support EV industry insights
- Helped stakeholders assess demand-side risks and inform long-term business planning for electric vehicles
