Professional Summary

Results-driven Software Engineer with 3+ years of experience building **Java microservices**, distributed backend systems, and event-driven architectures. Skilled in **Spring Boot**, **REST APIs**, **asynchronous programming (CompletableFuture, Futures)**, and designing scalable services with strong **reliability, redundancy, and high availability** principles. Hands-on experience with **AWS cloud-native** workloads (Lambda, SQS, EventBridge), **MongoDB Atlas**, SQL, and CI/CD pipelines using Jenkins and GitHub Actions. Familiar with modernization of enterprise applications. Delivered secure, scalable platforms for healthcare (Cigna/Evernorth) and energy (Baker Hughes). **Work Authorization:** STEM OPT through May 2027; **H-1B approved** (consular) through Oct 2027. Open to remote/hybrid roles; immediate start available.

Technical Skills

Programming: Java, Node.js, TypeScript, Python, SQL

Backend: Spring Boot, Hibernate, JPA, Microservices, RESTful APIs

Architecture: Distributed Systems, Event-Driven Architecture, API Versioning, High Availability, Scalability, Reliability

Frontend: Angular, RxJS, Angular Material, HTML5, CSS3

Cloud/DevOps: AWS (Lambda, S3, SQS, EventBridge), Docker, Kubernetes, Jenkins, GitHub CLI/Desktop, Terraform, OpenShift ACS

Databases: MongoDB (Compass, Atlas), Redis, MySQL, PostgreSQL

Analytics/ML: Tableau, Power BI, Pandas, NumPy, Scikit-learn, Jupyter

Testing: JUnit, Mockito, Jest, Spring Test

Tools: VS Code, CLI, Jira, Microsoft Office, RStudio

Professional Experience

Vertraus, Inc.

Software Developer

United States · Hybrid

May 2024 – Oct 2025

- Designed and delivered **Spring Boot microservices** and **REST APIs** for backend automation across business domains, including for clients **Evernorth Health Services** and **Express Scripts (Cigna)**.
- Led AWS migration for Evernorth, designing **serverless architectures** with **Lambda, SQS, EventBridge**, reducing infrastructure costs by 30%.
- Built **Node.js Lambda** functions for real-time data processing, improving throughput and reducing latency for event-driven workflows at Evernorth.
- Enhanced backend tools and integrated **RESTful APIs** for Express Scripts, improving client-facing applications.
- Implemented **Redis** caching and optimized data layers with **MongoDB Atlas** and **S3** for improved performance.
- Strengthened CI/CD workflows using **GitHub Actions** and **Jenkins**, reducing deployment time and risks.

Evernorth Health Services (Cigna)

Software Developer

Franklin, TN

Sep 2024 – Jun 2025

- Led AWS cloud-native migration of legacy Java systems; designed **serverless** architectures with **Lambda, SQS, EventBridge** achieving **30%** infrastructure cost reduction.
- Built modular **Node.js Lambda** functions for real-time processing; improved throughput and reduced latency for event-driven workflows.
- Engineered **MongoDB Atlas + S3** data layers and **Redis** caching to increase application performance by **30%**.
- Implemented **OpenShift ACS** policies and automated CI/CD using GitHub CLI; reduced deployment time by **40%**.
- Leveraged Amazon Q to automate developer workflows and code reviews, improving delivery velocity.

Express Scripts by Evernorth (Cigna) <i>Software Developer</i>	Remote <i>May 2024 – Sep 2024</i>
- Designed and delivered Spring Boot microservices and enterprise REST APIs for backend automation across business domains. - Remediated Docker image vulnerabilities; enforced security compliance and hardened runtime configs. - Streamlined release quality with orchestrator-based build verification; shortened cycle time and reduced rollback risk.	
Capgemini (Baker Hughes) <i>Java Full Stack Developer</i>	Hyderabad, India <i>Jun 2021 – Dec 2022</i>
- Delivered Angular + Spring Boot applications with JWT/OAuth 2.0 and role-based access control. - Revamped EngageSubsea platform UI/UX; implemented mobile-responsive design and improved task flows. - Managed MongoDB/SQL schemas, API integrations, and Agile sprints; supported \$25MM revenue and delivered \$5MM+ impact. - Built backend modules following event-driven architecture guidelines and integrated RESTful services with enterprise platforms. - Participated in design discussions for scalable microservices, focusing on response-time reduction and API stability.	

Internships

University of Alabama at Birmingham <i>Student Assistant</i>	Birmingham, AL <i>Dec 2023 – Apr 2024</i>
Managed data analysis and secure migration of sensitive records online.	
Capgemini <i>Full Stack Developer Intern</i>	Remote <i>Jan 2021 – Apr 2021</i>
Built responsive Angular interfaces and Java microservices; integrated MongoDB and REST endpoints.	
Allsoft Solutions <i>Data Science Intern</i>	Remote <i>Jun 2020 – Jul 2020</i>
Developed predictive models and data preprocessing pipelines leveraging IBM tooling.	
Board Infinity <i>Data Science Intern</i>	Remote <i>Jun 2019 – Jul 2019</i>
Built Tableau dashboards for TDMB datasets; produced interactive statistical insights.	

Project Highlights

EngageSubsea Revamp: Angular + Spring Boot redesign with OAuth 2.0 ; improved UX and mobile responsiveness.
AWS Microservices Pipeline: Real-time ingestion using Lambda, SQS, EventBridge ; event-driven orchestration.
CI/CD Automation: Secure Docker delivery with OpenShift ACS and automated pipelines.
Tableau IPL Dashboard: Interactive analytics with filters, drill-downs, and KPI summaries.

Education

University of Alabama at Birmingham <i>Master of Science in Computer Science, GPA: 3.40/4.00</i>	<i>Jan 2023 – Apr 2024</i>
Lovely Professional University (LPU) <i>B.Tech in Computer Science Engineering (Hons), GPA: 8.10/10</i>	<i>Aug 2017 – Apr 2021</i>

Certifications

Agile Software Development – Coursera
Machine Learning with Python – IBM
