PROFESSIONAL EXPERIENCE

Cigna Healthcare – Data Analytics & Operations (Intern)

(Jun 2024 – Jan 2025)

- Drove end-to-end automation of healthcare claims pipelines using AWS S3, Snowflake, and SQL, improving accuracy to 99%, cutting processing time by 50%, and freeing team capacity for higher-value strategic work.
- Designed and deployed Python-based (scikit-learn) fraud detection models, boosting anomaly detection by 40% and enabling proactive risk mitigation in line with HIPAA and SOC 2 compliance.
- Led cross-functional project delivery between Compliance, Risk, and IT, managing timelines, workflows, and requirements to launch a centralized audit platform 2 months early.
- Developed executive-ready Power BI dashboards to track vendor KPIs, enabling data-driven contract renegotiations and reducing cycle times for key business decisions.

Cognizant – Business Analyst

(Jan 2022 – Sept 2023)

- Gathered and translated business requirements for a \$5M CRM migration, aligning engineering, sales, and marketing teams to streamline workflows and increase lead conversion by 22%.
- Leveraged SQL and ad hoc analytics to identify churn drivers, informing a retention program that reduced attrition by 13% and improved customer lifetime value.
- Authored process documentation, SOPs, and wireframes that accelerated stakeholder sign-off and cut project approval timelines by 40%.
- Designed and deployed interactive Power BI dashboards tracking sales velocity and product adoption trends across 3 business units, enabling data-driven strategy adjustments.

Accenture – Researcher & Data Analytics (Intern)

(Jan 2021 – Apr 2021)

- Developed and automated ETL pipelines with SQL, Python, and Airflow, reducing manual processing by 40% and freeing capacity for higher-priority strategic initiatives.
- Consolidated fragmented Excel and PDF reports into centralized Power BI dashboards, cutting turnaround times by 30% and providing executives with real-time decision support.
- Performed data analysis on regulatory and environmental datasets, translating findings into actionable insights that informed policy recommendations and shaped RFP submissions.

Projects & Initiatives

AI-Powered Content Moderation Platform | United Nations International Computing Centre (UNICC)

Led cross-functional integration and deployment of a multilingual AI platform at UNICC, boosting data review efficiency by 60% and enabling global collaboration across 6+ regions.

CERTIFICATIONS

AWS Certified Data Engineer – Associate – Validates expertise in data ingestion, ETL pipeline design, schema modeling, governance, and performance optimization on AWS (S3, Redshift, Glue, Lambda, EC2).

TECHNICAL & BUSINESS SKILLS

Languages & Tools: SQL (CTEs, Window Functions), Python (Pandas, NumPy, scikit-learn), R, Excel (VBA, PivotTables), Tableau, Power BI

Platforms & Cloud: Snowflake, AWS (S3, Lambda), Airflow, Looker, Salesforce, JIRA, Git

Methodologies: Agile (Scrum/Kanban), A/B Testing, Financial Modeling, Forecasting, ETL Automation, Requirements Gathering

Business & Strategy: Data Storytelling, Cross-Functional Collaboration, Process Optimization, Executive Reporting, Stakeholder Management

EDUCATION

New York University

Master's in Management & Systems, **GPA: 3.8**

NYC, NY

Sept 2023 – May 2025

Sunrise University

Bachelor of Technology in Computer Science, **GPA: 3.9**

Rajasthan, IN

June 2019 – May 2022
