

AHMED ONIMISI ABDULWAHAB

No 5 S.F. 15 Kabala West, Kaduna
8066799167 | ahmedabdulwahab1212@gmail.com

Objective

Certified Google Data Analytics with a background in applied science and hands-on experience transforming raw data into actionable insights. Expertise in Python (Pandas, NumPy), SQL, and Tableau, with a proven ability to automate processes—reducing data cleaning time from hours to minutes—and deliver clear, visual reports. Eager to apply my analytical skills and data-driven approach to solve complex business problems in a collaborative environment.

Experience

- Modern Crown Academy** 2017 - 2024
Chemistry and Math Tutor
Developed a high-performance Python (Pandas, Numpy) application capable of handling (>100,000) rows to automate the cleaning and analysis of large-scale student performance datasets reducing processing time from several hours to minutes and enabling weekly, data-driven academic reviews.

Conducted in-depth analysis of exam results and continuous assessment data to identify performance trends and knowledge gaps. Translated findings into actionable strategies for curriculum adjustment, contributing to an improvement in national exam scores.

Utilized complex multi-table joins and aggregate functions to generate comprehensive performance reports for management, tracking key metrics and intervention outcomes.

Developed interactive dashboards and visual reports in Tableau and MS Excel to communicate complex data insights on student progress to technical and non-technical stakeholders, including teachers and parents.
- Princess Rahma School** 2024 - Present
Chemistry and Math Tutor
Applied analytical skills to assess and interpret student performance data, using MS Excel (including PivotTables and advanced formulas) to track academic progress and identify areas for improvement.

Collaborated with the administrative and teaching staff to foster a productive, tech-focused educational environment based on empirical evidence and shared data insights.

Integrated data analytics and technology into the classroom, inspiring student interest in STEM through practical, data-oriented projects and participation in science clubs.

Spearheaded the adoption of data-driven methodologies within the Science Department. Mentored and trained 5+ teaching staff on utilizing Excel for effective entry of result.

Projects

- Cryptocurrency Market Analysis**
 - Used Excel and Tableau to clean and analyze Bitcoin price data (June-July 2025).
 - Created a Tableau dashboard to show weekly price trends and daily volatility.
 - Shared the analysis on LinkedIn to explain market insights.
- High-Performance Data Cleaner**
 - Built a Python app (Pandas, NumPy) to clean and analyze large files (>100,000 rows).
 - Reduced data processing time from hours to minutes.
- Web Data Scraper**
 - Built a Python tool (Requests, Pandas) to scrape tables from websites and save them as CSV or Excel for analysis.

Skills

- Programming: Python (Pandas, NumPy, Matplotlib, Web Scraping), SQL, R (Tidyverse)

- Visualization: Tableau, Matplotlib, Seaborn
- Analysis Tools: Advanced MS Excel (Pivot Tables, VLOOKUPs, Power Query), Tableau Prep
- Machine Learning: K-means Clustering, Unsupervised Learning
- Core Skills: Data Cleaning, Process Automation, Data Storytelling, Statistical Analysis

Education

- **Usmanu Danfodio University** 2016 - 2023
B.Sc. Applied Chemistry
- **CURSA**
Google Data Analytics
- **CURSA**
Python
- **CURSA**
Pandas library
