

Career Objective

Dedicated Industrial Engineering graduate with a passion for process optimization and operational excellence. Seeking a challenging role in a dynamic organization where I can leverage my technical skills, problem-solving abilities, and hands-on experience to drive continuous improvement and deliver impactful results.

Professional Experience

Industrial Engineer

Mobis North America | Toledo, Ohio | Oct 2023 – Dec 2024

- Conducted time studies to evaluate process capability, timing, and risks.
- Designed and optimized tools and plant layouts using AutoCAD.
- Implemented standardized work processes and Kaizen projects to improve efficiency.
- Led waste reduction initiatives, improving process performance, cost efficiency, and customer outcomes.

Industrial Specialist

Ford Kentucky Truck Plant (G-TECH) | Louisville, Kentucky | Jul 2022 – Nov 2022

- Monitored dock operations and receiving processes within an automotive assembly plant.
- Collected and analyzed operational data to compare actual performance to design intent.
- Developed and implemented Kaizen projects to optimize workflows.
- Conducted root cause analysis to resolve discrepancies in planned versus actual operations.

Industrial Engineer

Consumers Energy (ICONMA) | Michigan, U.S. | Oct 2021 – Dec 2021

- Performed time studies to identify process inefficiencies and mitigate risks.
 - Conducted root cause analysis to address operational discrepancies.
 - Implemented waste reduction strategies, achieving cost savings and process improvements.
 - Documented and standardized workflows, driving operational excellence.
-

Projects

Smart Packaging for Drug Supply | Jan 2021 – Apr 2021

- Collaborated with engineers to develop a prototype for visually impaired users.
- Conducted thorough root cause analysis to address design challenges creatively and efficiently.
- Contributed ideas during brainstorming sessions to generate innovative design solutions, enhancing the user experience.

Mecco Design Team (Laser Equipment Supplier) | Jan 2021 – Apr 2021

- Created templates to identify bugs affecting production timelines and user experience.
 - Standardized electrical block diagrams for improved clarity in fast-paced assembly environments.
 - Applied engineering principles including SOPs, FMEA, process mapping, and standard work documentation.
-

Education

University of Pittsburgh | Bachelor of Science in Industrial Engineering | Aug 2016 – May 2021

Skills

- **Engineering Tools:** AutoCAD 2024, SolidWorks, MATLAB, Simio, Minitab
- **Software:** Microsoft Office Suite (Word, Excel, PowerPoint), 3D Printing Software
- **Process Improvement:** Time Studies, Kaizen, Root Cause Analysis, FMEA, Process Mapping
- **Professional Strengths:** Problem-Solving and Analytical Thinking, Process Optimization, Waste Reduction, Collaboration and Teamwork, and Strong Communication Skills.
- **Languages:** Arabic and English
