PROFESSIONAL EXPERIENCE

NIPSCO/NiSource LLC - Chicago, IL

May 2024 - Present

Help Desk Analyst/Tech Consultant

Streamlined IT service delivery for NIPSCO/NiSource LLC by resolving a high volume of user inquiries via phone and email, achieving a 20% first-call resolution rate.

- Efficiently fielded and managed incoming help requests from end users via telephone and email, ensuring a courteous and professional response, resulting in high user satisfaction.
- Accurately documented all pertinent end user identification information, including name, department, contact information, and nature of issues, facilitating effective and organized problem resolution.
- Successfully built rapport with help desk customers, eliciting detailed problem descriptions to streamline troubleshooting and reduce resolution times.
- Prioritized and scheduled technical issues effectively, escalating complex problems to the appropriately experienced technician when necessary, ensuring timely resolutions and minimal downtime.
- Meticulously recorded, tracked, and documented the help desk request problem-solving process, including all decisions made and actions taken, contributing to a comprehensive knowledge base and continuous improvement in support services.
- Applied diagnostic utilities to troubleshoot and resolve technical issues, enhancing support efficiency and reducing repeat incidents.
- Proactively accessed and utilized software updates, drivers, knowledge bases, and frequently asked questions resources on the internet to aid in problem resolution, achieving a high success rate in issue resolution.
- Continuously identified and learned appropriate software and hardware used and supported by the organization, improving overall technical support capabilities and staying current with industry advancements.

TEKsystems/ZT Systems - Chicago, IL

August 2023 - April 2024

Data Center IT Technician

- Ensured timely resolution of data center incidents by responding efficiently to Service Desk tickets, exceeding company Service Level Agreements (SLAs) by 25%.
- Provided exceptional technical support to users by troubleshooting complex technical issues affecting data center operations, resulting in increased uptime and user productivity.

- Implemented data backup best practices by assisting users with secure data backups on network file shares and external media, minimizing data loss risks.
- Enhanced data center security and access control by efficiently creating, managing, and securing user accounts, computer data, and network access within Active Directory.
- Collaborated effectively with company Executives and Engineers to identify and implement operational improvements within the data center, achieving a [percentage] increase in efficiency while maintaining robust data security.
