PROFESSIONAL SUMMARY

Senior Processing Engineer with 9+ years of experience in upstream biopharmaceutical manufacturing. Proven expertise in technology transfer, process development, bioreactor operations, and GMP compliance. Skilled in executing process scale-up, validation (PPQ, PQ), risk assessment, and equipment commissioning. Adept at cross-functional collaboration, real-time troubleshooting, and continuous improvement. Experienced with DeltaV, TruBio, JMP, SAP, and regulatory audits.

CORE COMPETENCIES

Upstream Processing • Technology Transfer (R&D to GMP) • Bioreactor Operations (Single-Use & Stainless Steel) • cGMP Compliance & FDA Regulations • Process Scale-Up & Optimization • Process Validation (PPQ, PQ, Hold Studies) • Equipment Commissioning & Qualification (IQ/OQ/PQ) • Data Analysis (JMP, R) • Root Cause Analysis & CAPA • Change Control & Deviation Management • Six Sigma / Lean Manufacturing • SOP & Batch Record Development • Team Leadership & Training • Process Risk Assessment (FMEA, HACCP)

PROFESSIONAL EXPERIENCE

Thermo Fisher Scientific – St. Louis, MO

Processing Engineer III / II | Feb 2023 – Present

- Led six upstream technology transfers from R&D to GMP manufacturing, enabling successful PPQ execution and

commercial launch readiness.

- Spearheaded commissioning and start-up of a new manufacturing suite, increasing site production capacity by 35%.
- Managed upstream operations across single-use bioreactors (50L–5,000L), including GE Xcellerex and Thermo HyPerforma systems.
- Supported 24/7 manufacturing floor with real-time troubleshooting, reducing batch deviation rates by 22% YoY.
- Evaluated and integrated clarification and automation technologies, reducing manual labor by 30% and improving batch consistency.
- Authored and approved 50+ GMP-compliant documents including SOPs, Master Batch Records (MBRs), and Media Formulation Records (MFRs).
- Mentored 10+ engineers and associates, driving training completion and early proficiency.
- Served as technical SME during internal, customer, and regulatory audits, contributing to zero major observations.
- Conducted process trending and multivariate analysis (JMP/R), identifying process improvement opportunities and reducing variability.

MilliporeSigma – St. Louis, MO

Senior Production Scientist → Scientist → Associate Scientist |
Sep 2016 – Apr 2021

- Led cost reduction initiatives using Lean and Six Sigma principles; achieved 30–50% operational savings through lab automation.
- Performed impurity profiling, enzymatic assays, and protein quantification (UV-Vis, BCA, inhibitor screening) in a regulated GMP setting.

- Executed method qualification and assay development for biologics and recombinant protein production.
- Created and maintained SOPs, trained junior analysts, and ensured adherence to cGMP and ICH Q7 standards.
- Managed material logistics and batch execution records using SAP ERP and EDMS platforms.
- Collaborated with QA and QC teams to streamline batch release timelines and improve right-first-time metrics.

TECHNICAL SKILLS

Automation Systems: DeltaV, TruBio

Data Analysis Tools: JMP, R

Compliance Systems: GMP, FDA, CAPA, Change Control, Deviations

Validation: IQ, OQ, PQ, PPQ, Hold Time Studies, Media Fill

Enterprise Tools: SAP, EDMS, Microsoft Office Suite

EDUCATION

Master of Business Administration (MBA)

Webster University – St. Louis, MO | 2021

Bachelor of Science, Biology

McKendree University – Lebanon, IL | 2016

CERTIFICATIONS & TRAINING

- Six Sigma Green Belt (in progress / completed)
- GMP & GDP Training (Annual)
- Bioreactor Scale-Up & Control Strategies

LEADERSHIP & IMPACT

- Directed cross-departmental process improvement projects aligned with site operational KPIs.
- Developed structured onboarding programs for junior

engineers, reducing time-to-productivity by 40%.

- Recognized for enhancing upstream throughput and reducing process variability through automation-driven innovation.
