

AINA MARYAM

📍 Waxahachie, Texas ✉️ ainamaryam@utexas.edu ☎️ 469-732-8001 📺 in/ainamaryam 🌐 github.com/aina-maryam

SUMMARY

Data Analyst with expertise in Python, SQL, and BI tools, experienced in ecological research, political data verification, and business analytics. Holds dual master's degrees in Artificial Intelligence and Bioinformatics, with proven skills in data cleaning, visualization, and machine learning.

SKILLS

Python Libraries – Scikit Learn, NumPy, Pandas, Plotly, Matplotlib, Seaborn

Tools – Power BI, Tableau, MS PowerPoint, Jupyter, Colab, MS Excel – Pivot Tables, Pivot Charts, LOOKUP

Programming Languages – Python, SQL, C/C++, MATLAB (Familiar), R (Familiar)

Data Analysis – Descriptive Statistics, Inferential Statistics, OMICS Data Analysis

EXPERIENCE

Data Analyst

Venomous Herpetology Research & Education Collective (VHREC)

September 2025 – Present

- Conducted data cleaning and standardization on observational datasets of venomous reptiles, ensuring integrity and reproducibility for ecological research.
- Developed a reliability scoring pipeline (Python, Pandas) that integrated factors such as quality grade, positional accuracy, and identification consensus to produce 0–1 confidence metrics for >400 species observations.
- Built automated, modular workflows for CSV preprocessing, documentation, and reproducible re-runs, supporting species distribution modeling (SDM) and conservation research.
- Produced summary statistics and visualizations (distribution histograms, reliability score reports) to help researchers prioritize high-quality records for downstream analyses.
- Collaborated with herpetology researchers to translate complex data quality metrics into actionable insights for field surveys, risk assessment, and educational outreach.

Volunteer

Ballotpedia

July 2025 – Present

- Conducted research on local and state political candidates to ensure accurate and up-to-date information in Ballotpedia's database.
- Verified campaign details including candidate websites and official email addresses, ensuring public accessibility and transparency.
- Maintained records by updating candidate profiles with "Last Checked" dates to improve reliability of election information.
- Gained hands-on experience with political data entry, fact-checking, and database management while contributing to a neutral, nonpartisan resource.

Data Science Intern

Oeson

August 2024 – December 2024

- Conducted comprehensive exploratory data analysis on diverse datasets (public and proprietary) using Python libraries Pandas and NumPy.
- Utilized inferential and descriptive statistical methods to analyze complex data, informing business strategies and optimizing processes.
- Created interactive visualizations using Tableau, Matplotlib, Plotly and Seaborn and implemented machine learning algorithms using Scikit-learn.
- Developed expertise in data storytelling, presenting findings to both technical and non-technical audiences.

EDUCATION

Master of Science in Artificial Intelligence

University of Texas at Austin • Austin, TX • 4.0 GPA

Master of Science in Bioinformatics

Maulana Azad National Institute of Technology • Bhopal, MP • 3.7 GPA

Bachelor of Science in Biotechnology

Shobhit University • Meerut, UP • 3.7 GPA
