

Aishwarya Doma

aishwarya.doma@wmich.edu |(269)-550-5121 |Kalamazoo, MI, USA | <https://www.linkedin.com/in/aishwarya-doma/>

TECHNICALSKILLS

Programming Languages & Web Technologies: Python, JavaScript, TypeScript, HTML, CSS, React.js, REST API

Databases: SQL (SQL Server, MySQL, PostgreSQL), MongoDB

Frameworks: MERN Stack, Django, Pandas, NumPy, PyTorch, TensorFlow, Scikit-Learn, Selenium, Cucumber

DevOps Cloud & OS : AWS (S3, Lambda, EC2), Azure, Apache, Linux, Maven, Docker

Version Control & Tools: Git, GitHub, JIRA , Postman

Methodologies: Agile (Scrum), Software Development Life Cycle, Code Review, Test Automation, Continuous Integration/Deployment

EXPERIENCE

Full Stack Engineer

Oct 2022 – Aug 2023

Tech Mahindra, India

- Designed and deployed full-stack web applications using Angular and React, elevated user engagement by 46% through interactive UI/UX, and served 200+ daily active users.
- Built and refined responsive UI components with Angular, HTML, and CSS, boosting user engagement by 30%.
- Implemented and streamlined RESTful APIs and optimized SQL Server and MongoDB queries, reducing data retrieval time by 40% and improving overall system performance by 25%.
- Partnered in Agile teams, actively participating in over 150 daily stand-ups, sprint planning sessions, and code reviews, consistently upholding development best practices.

Front End Developer

Feb 2021–Sep 2022

Tech Mahindra, India

- Spearheaded highly responsive web applications using React, optimizing UI performance and reducing page load time by 35%, while managing complex state with Redux.
- Refined SQL queries and database interactions, cutting query execution time by 50% and improving data retrieval efficiency for high-traffic applications.
- Streamlined 250+ automated test cases using Selenium, identifying and resolving 95% of critical UI and backend integration issues before production.

Engineer Trainee

Tech Mahindra, India

Nov 2020 – Jan 2021

- Mastered foundational principles in Python full-stack development, completing 2 projects using Django, REST APIs, and front-end technologies.
- Utilized MySQL for database management in three projects and Docker for application deployment in two projects.
- Established a centralized documentation repository, leading to a 20% reduction in stakeholder inquiries and accelerating the deployment of 11 projects, as praised by senior leadership.

EDUCATION

- Masters in Computer Science, *Western Michigan University, Kalamazoo, Michigan, USA (GPA –3.5).* Aug 2023 – Apr 2025
- Bachelors in Computer Science & Engineering, *Guru Nanak Institutions Technical Campus,(GPA-3.6)* Aug 2016 – Jul 2020

PROJECTS

- Blog Application \ Python, Django, React**
Engineered a scalable blog platform utilizing Django, React, and MySQL that supports secure authentication and role-based access, optimized API performance to handle 100+ posts, reducing load times by 42%
- Speech Emotion Recognition | Python, Revdness, Tensors**
Engineered a speech emotion recognition system using Python, Revdness dataset, and TensorFlow, achieving a 70% noise reduction with advanced techniques
- Retrieval Augmented Generation Chatbot | Python, Gemma, Gemini, PDFMiner**
Implemented an AI chatbot with Python and Gemini, reducing manual ticket handling time by 45% and enabling support staff to focus on more complex customer issues.

ADDITIONAL SKILLS

- Strong in Test-Driven Development, Behavior-Driven Development, and skilled in software design patterns and architectural principles.
- Thrive in collaborative environments, building strong relationships with colleagues and stakeholders.
- Able to explain complex ideas to different audiences while maintaining accuracy and high standards.
