CERTIFICATIONS

Microsoft Power Platform Certifications AZ-900, PL-900, PL-100

WORK EXPERIENCE

Data Scientist, Associate

Nov 2024- Present

Amgen, Seattle, USA

Developed a PowerApp solution with PowerAutomate integration to streamline raw materials management across four supply chain process stages, reducing turnaround time from 3 months to 1 month..

- Built and maintained Tableau dashboards showcasing KPIs for executives, managers, and specialists, enabling real-time insights into raw material performance, inventory bottlenecks, and procurement efficiency.
- Engineered end-to-end data pipelines in Databricks (SQL + Apache Spark) to extract and optimize SAP data for PowerApp usage, while supporting issue resolution, user training, documentation, and Jira-based project tracking for team transformation.

Security Data Analyst

Jan 2024 – Apr 2024

Pinkerton Seattle, USA

- Utilize Microsoft technologies (SharePoint, Microsoft 365, Azure DevOps etc.) and the Power Platform Suite (Power Apps, Power Automate, Power BI) to digitally transform manual workflows and create streamlined automations and solutions.
- Design, build, maintain and analyze Power BI reports using SQL, DAX and M language to provide security metrics and trend analysis.

Senior Technical Analyst

April 2022 – Mar 2023

Thomson Reuters Hyderabad, India

- Architected and developed a Power Platform solution for financial analysts in the Procurement and Marketing team to process Purchase Orders, providing a time savings of 200 percent during report creation for financial analysts.
- Also developed a chatbot used daily by an average of about 100 users for performing Purchase Order status checks.
- Created Procurement Analysis Power BI reports that would help the financial analysts know about the spending trends of different vendors.
- Took on 'Gig' projects for fellow teams in the organization.
- Revamped the existing UI platform being used for creation of job postings for internal approval; the new UI was built to be responsive out of the box, and provided time-savings of 100 percent for the app's users.
- Provided mentorship to beginners in the organization by designing and presenting a "Basics of PowerApps and PowerAutomate" training course for beginners in the organization. Created and presented the course content, and conducted an assessment challenge for attendees.

Business Intelligence and Arch Analyst

Feb 2021 – Mar 2022

Accenture India Hyderabad, India

- Developed a PowerApp for Vaccination signups during the Covid-19 pandemic for employees of the company.
- Developed a Project risk assessment Power Platform for use by Product leadership for a hackathon. This includes PowerApp as front end and Power BI reports for analysis. Won the first prize for this effort.
- Developed a responsive PowerApp with a Sharepoint backend for a telecom Service provider for processing taxation workflows.

Engineer

Dec 2017 – Dec 2020

Mindtree Pvt. Ltd. Hyderabad, India

- Created a unified workflow for administrative approvals using PowerAutomate and reduced manual efforts by 70 percent. Created an attendance PowerApp with SharePoint as the database for an organization of 100 employees.
- Designed an ETL workflow using Microsoft Data Flow for porting 40,000 records in excel data files to a Dataverse backend
- Provided training on PowerApps and PowerAutomate to 30 employees. Resolved 200 tickets as part of the support for live Power BI and PowerApps projects

- Hands-on experience with Microsoft Power BI Project. Development experience with Power BI Data modeling M queries, DAX calculations, excel, Python for creating custom visuals. Experience on Power BI service, Report Development, Dataflow, Gateway management, developing Reports, embedding reports via SharePoint and providing backend support as well.
