WORK EXPERIENCE

Healthcare Program Manager

Jul 2023 - Present

Piccadilly Dental Alliance, New Jersey

- Directed data-driven clinical project management across 40+ practices, improving protocol adherence and enhancing patient safety.
- Implemented a comprehensive clinical quality assurance program, conducting audits of treatment plans, patient records, and clinical outcomes, improving clinical compliance metrics more than 2 times.
- Partnered with cardiology consultants to integrate oral-systemic health protocols with cardiovascular risk reduction strategies, enhancing care coordination for high-risk patient populations.
- Administered the integration of EHR systems across all locations, ensuring HIPAA compliance and streamlining documentation, which reduced reporting errors by 30% and enabled clinicians to access accurate data for timely patient care decisions.
- Managed budgets through comprehensive needs assessment and performance monitoring, reducing operation cost by 11%.

Public Health Intern

May 2022 - Aug 2022

Yale New Haven Health, New Haven, CT

- Developed and implemented evidence-based antibiotic protocols using infection data and best-practice research, reducing gentamicin-related infections by 60% in Yale's Cardiology Department.
- Built Tableau dashboards to analyze infection patterns, reducing hospital-associated infections by nearly half.
- Coordinated Phase III diabetes trial operations with sponsors and clinical teams, optimizing recruitment, data collection, and timelines, achieving 100% enrollment targets and ensuring regulatory compliance.
- Performed a 3-month retrospective study using EPIC to evaluate a new hypertension treatment protocol, demonstrated significant improvements in blood pressure among patients aged 25 to 60 and provided insights for evidence-based decision-making.

Health Program Ambassador

Feb 2022 - May 2022

University of New Haven, West Haven, CT

- Led campus COVID-19 testing with streamlined data protocols, reducing transmission by over half and enhancing monitoring accuracy.
- Enhanced infection tracking and cross-center collaboration, accelerating outbreak detection tenfold for rapid, data-driven responses.
- Implemented targeted health policies and risk assessments, halving infection spread and safeguarding research participants and staff.

Clinical Research Program Coordinator

May 2017 - Jun 2021

Bharati Vidyapeeth Hospital, Pune, MH

- Directed 18 clinical trial sites, resolving recruitment, retention, and resource challenges, increasing study efficiency by over one-third and accelerating trial execution.
- Oversaw site visits, remote monitoring, and close-outs for 13 trials, achieving full GCP/ICH compliance with zero audit findings.
- Liaised with IRBs to secure approvals for 11 projects, cutting approval time by 2 weeks and enhancing stakeholder collaboration.
- Streamlined drug safety and clinical database reconciliation, improving adverse event reporting, increasing accuracy by 15% and ensuring consistency across 100+ reports.
