

# AISHWARYA MAHESHA

Saint Louis, MO 63108 | +1(314)-277-4625 | [aishwarya.academic1@gmail.com](mailto:aishwarya.academic1@gmail.com) | [LinkedIn](#)

## Summary

Health Data Science professional with a unique blend of clinical expertise and technical proficiency in data analysis, machine learning, and visualization. Experienced in deriving actionable insights from complex healthcare datasets to improve patient outcomes and streamline healthcare operations. Proven success in developing predictive models, creating interactive dashboards, and identifying trends that drive data-informed decisions. Seeking a **Healthcare Data Analyst** role to bridge the gap between clinical care and data-driven innovation.

## Education

|                                                                                 |                                                |
|---------------------------------------------------------------------------------|------------------------------------------------|
| <b>Master of Science: Health Data Science</b><br>Saint Louis University         | <b>Dec 2024</b><br>St Louis, MO                |
| <b>Bachelor of Dental Surgery</b><br>Rajiv Gandhi University of Health Sciences | <b>Dec 2019</b><br>Bangalore, Karnataka, INDIA |

## Skills

|                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ul style="list-style-type: none"><li><b>Prediction of Polycystic Ovary Syndrome (PCOS) using ML:</b> Developed machine learning models utilizing a dataset with 42 features and 542 records to predict PCOS. Achieved <b>88.88% accuracy</b> using Random Forest, with feature selection identifying follicle counts as a key predictor. Created visualizations and trend analyses to support early diagnosis and personalized care strategies.</li><li><b>Stroke Prediction Using Machine Learning:</b> Designed and evaluated ML models, achieving <b>93.84% accuracy</b> with the Naive Bayes Classifier. Analyzed clinical risk factors such as age, BMI, and hypertension to determine stroke likelihood. Developed interactive visualizations (heatmaps, scatter plots) to aid in clinical decision-making.</li><li><b>COVID - 19 vaccination coverage and its effectiveness:</b> Assessed the impact of vaccination campaigns and identified disparities in vaccine distribution. Implemented data-driven strategies to enhance vaccination rates and mitigate health inequities.</li></ul> |
