

AISHWARYA AAKASH

JAVA FULL STACK DEVELOPER

Virginia, USA | (973) 557-9217 | aishwaryawork16800@gmail.com | [LinkedIn](#)

SUMMARY

- Full Stack Developer with 4+ years' experience building scalable cloud-native applications using **Java, Spring Boot, Python, Django, AngularJS & MongoDB**, leveraging AI-assisted tools to accelerate coding, testing, & documentation.
- Developed scalable back-end services and RESTful APIs using **Microservices** with **Kafka, AWS Lambda, Redis, & Celery**, improving throughput and reliability. Used **GitHub Copilot & AWS CodeWhisperer** to accelerate Java API development.
- Built responsive, user-centric front-end interfaces with **React.js, Redux, TypeScript, HTML5, CSS3, and Bootstrap** while improving performance and UI consistency, using **Copilot Chat** for component generation and code cleanup.
- Configured and managed CI/CD pipelines using **Jenkins, Docker, Kubernetes, and AWS EKS**, automating deployments, orchestrating scalable containerized applications, & enabling zero-downtime rollouts across production environments.
- Delivered high-quality software through **Agile Scrum**, using **Jira** for planning and **Git** for version control. Integrated **Applitools Eyes** and **Testim.io** to support automated testing and visual regression checks.
- Strong in debugging, performance optimization, and QA using **JUnit, Mockito, PyTest, and Jest**, with experience across **SQL, PostgreSQL, MongoDB, and Amazon RDS**, leveraging **Confluence AI** for efficient documentation.

SKILLS

Programming Languages:	Java, C, C++, SQL, Python, Typescript, JavaScript
Frameworks:	Struts, Spring Boot, Spring Batch, Spring Security, Spring AOP, Spring Core, Angular 12, GraphQL, Express.js, Vue.js
Web Technologies:	HTML5, CSS/CSS3, Tailwind CSS, AJAX, jQuery, Bootstrap, XML, JSON, UI, Material, SASS, ES6, Redux, React Hooks, REST API, RESTful API, React.js
Java/J2EE Technologies:	Servlets, EJB, JTA, JDBC, JSP, Webservices, Microservices, Spring MVC, Hibernate, ORM
Database:	Oracle SQL, MySQL, MongoDB, PostgreSQL, PL/SQL, DynamoDB
Cloud Platforms:	Amazon Web Services (ECS, EKS, Lambda, S3, API Gateway, CloudWatch)
IDEs:	Visual Studio Code, Eclipse IDE, IntelliJ IDEA, Spring Tool Suite (STS)
Web/Application Servers:	Oracle WebLogic, IBM WebSphere, Apache Tomcat, JBoss
Testing Tools:	JUnit, Mockito, Selenium, Applitools Eyes, Testim.io
AI/ML Tools:	GitHub Copilot, AWS CodeWhisperer, Copilot Chat, Confluence AI, Tabnine AI
Build/ Other Tools:	Maven, Gradle, Jenkins, Docker, Kubernetes, SOAP, Postman, Jira, SonarQube, Kafka
Methodologies:	SDLC, Agile (SRCUM), Waterfall
Version Control:	Git, GitHub, SVN, Bitbucket
Operating System:	Windows, Linux, Mac OS

EXPERIENCE

Java Full Stack Developer | Blue Cross Blue Shield of Florida, FL

Aug 2024 – Present

- Designed interactive patient portals using **React.js, HTML5, CSS3, and JavaScript**, leveraging **GitHub Copilot** to accelerate development and improve user engagement by 35% for dashboards and scheduling.
- Built telemedicine features for scheduling, joining, and reviewing virtual consultations, improving doctor-patient communication by 30% and increasing patient engagement by 25%.
- Integrated **Spring Security** with **JWT authentication**, reducing login delays by 30%, enhancing security by 40%, and implementing role-based access control and stateless token validation for **HIPAA-compliant patient sessions**.
- Utilized **JPA** and **Hibernate ORM** to map **Java objects to MySQL tables**, improving query efficiency by 40%, reducing database response time, and accelerating development by 25% through optimized **SQL** generation and caching.
- Developed global exception handling using **@ControllerAdvice**, returning precise **HTTP status codes** & error messages, reducing application errors by 20% & improving client-side troubleshooting for invalid appointments or missing lab results.
- Applied **Java concurrency utilities** (ExecutorService, synchronized) to process simultaneous patient activities, maintaining 80% data integrity and consistent performance under peak loads exceeding **10,000 concurrent users**.
- Configured **Amazon S3** to securely store and serve patient documents and medical records, implementing presigned URLs and bucket policies, achieving data durability and high availability.
- Implemented **Apache Kafka** for real-time streaming of appointment notifications, lab results, and claim updates, processing over **50,000 events per day** with low latency to support an event-driven architecture.
- Participated in **Agile**, collaborating with cross-functional teams to deliver healthcare solutions, reducing sprint delays by 15% and using **Applitools Eyes** for **AI-assisted visual testing** of dashboards and portals.

Software Engineer | Tata Consultancy Services, India

Aug 2021 – Aug 2023

- Analyzed, designed, developed, tested, debugged, & deployed web applications for Openreach using **Java, Spring Boot, Microservices, Angular, & Bootstrap**, delivering scalable, high-performance solutions with enterprise-grade reliability.
- Applied **Agile methodologies** and **Scrum** practices with **JIRA**, participating in daily stand-ups, sprint planning, design calls, and cross-functional collaboration to ensure timely delivery and alignment with business requirements.
- Built front-end components using **Angular 8, HTML, CSS, JSON, and Bootstrap**, integrated REST APIs for backend connectivity, leveraging **Tabnine AI** for code suggestions and faster development.
- Developed database solutions with **PL/SQL**, implementing **CRUD operations** and **automated workflows**, and performed integration testing using Swagger and Postman to ensure seamless consumption of RESTful services.
- Wrote **JUnit** test cases following **Test-Driven Development (TDD)** practices, incorporated **SonarQube** for code quality and coverage analysis, reducing bugs, improving performance, and maintaining maintainable, reusable code.
- Managed **CI/CD pipelines** using **Jenkins**, deploying applications on **Apache servers**, optimizing release cycles, and ensuring robust, automated, and repeatable deployment processes across environments.
- Created and maintained technical documentation, API notes, and design diagrams using **Confluence AI**, improving team productivity and knowledge sharing.
- Recognized as “**Employee of the Month**” in the fresher category for exceptional contributions, demonstrating strong technical skills, teamwork, and commitment to delivering high-quality enterprise solutions.

Java Full Stack Developer | Capgemini, India

May 2020 – Jul 2021

- Spearheaded the design and development of a scalable online retail platform using **Spring Boot, Java 8, JPA, & Oracle**, streamlining inventory, payment, & returns workflows, improving operational efficiency by 35% across business units.
- Developed robust **RESTful APIs** with **Spring Security** (OAuth 2.0) to enable secure data exchange, real-time inventory updates, and asynchronous payment confirmation alerts across distributed microservices.
- Engineered dynamic product browsing and checkout forms using **ReactJS** and integrated them with backend APIs via **AJAX**, enabling auto-suggestions, real-time validations, and a seamless shopping experience for over 25,000 users.
- Built **AWS Lambda** functions to automate tasks like dynamic pricing calculations, validating return requests, and archiving completed orders using **SQS, CloudWatch Events, and Batch jobs**.
- Set up containerized environments for all **microservices** using **Docker** and deployed them on **Kubernetes clusters**, ensuring horizontal scalability, version isolation, and high availability of critical retail services.
- Configured **CI/CD pipelines** using **Jenkins**, automating unit tests, integration builds, container image creation, and deployment to dev/UAT/prod clusters, reducing manual errors and accelerating release cycles.
- Integrated **Resilience4j** for fault tolerance, and configured **Prometheus/Grafana** dashboards to monitor API latency, resource usage, and service health, improving system reliability and reducing downtime by **25%**.
- Implemented unit and integration tests using **JUnit and Mockito**, achieving 85%+ code coverage, and integrated **Mabl** for AI-assisted functional and regression testing of checkout and inventory workflows.
- Created customized dashboards using **AWS CloudWatch metrics** to track microservice health and performance, enabling proactive monitoring and reducing incident response time by **40%**.

EDUCATION

Lindsey Wilson College

Aug 2023 - May 2025

Master of Science in Technology Management

Jawaharlal Nehru Technological University

Jul 2017 – May 2022

Bachelors in Electronics and Communication

CERTIFICATIONS

- IBM Agile and Scrum Fundamentals
- Introduction to the Internet of Things and Embedded Systems
- Cryptography and Information Theory
- AI for Everyone
- Programming for Everybody
- Python Data Structure
