EDUCATION

University of Utah – Master of Science, Information Systems (STEM)

Salt Lake City, UT • Aug 2022 – Aug 2023 • Scholarship Recipient

Indiana University of Pennsylvania – MBA, Finance & Business Analytics

Indiana, PA • Jun 2016 – May 2018

University of Mumbai – Bachelor of Commerce (Computer Systems & Applications)

Mumbai, India • Jun 2013 – Mar 2016

TECHNICAL SKILLS

Business Intelligence & Visualization: Power BI (DAX, Data Modeling), Tableau, Domo, SharePoint

Data & Cloud Platforms: Snowflake, AWS Cloud, Microsoft Fabric

ETL & Data Engineering: SQL, ETL/ELT Pipelines, Data Warehousing, Data Quality Validation, Data Governance, MDM

API & Testing Tools: Postman, Apigee/ACE, Swagger, Selenium, TestRail, Provar

ERP & CRM: SAP, Oracle ERP

Modeling & Design Tools: Lucidchart, Draw.io, Microsoft Visio, Balsamiq, Figma, BPMN

Agile & Project Tools: JIRA, Confluence, Azure DevOps, Smartsheet, ServiceNow, TFS

AI & Productivity: Microsoft Copilot, ChatGPT, Microsoft 365

Methodologies: Agile (Scrum, Kanban), SDLC, Waterfall, ITIL

WORK EXPERIENCE

Truist Bank- Lead Business System Analyst , BI Analyst

Los Angeles, CA • Mar 2025 – Nov 2025

Project: Banking Data Transformation- (Compliance, Data Integrity, BI Modernization)

- Evaluated end-to-end banking workflows and optimized systems to ensure 100% regulatory compliance, reducing risk exposure.
- Built Power BI semantic models and DAX measures to support regulatory dashboards, improving reporting accuracy.
- Translated 15+ business requirements per month into functional specifications and configurations, improving delivery accuracy.
- Led data profiling, mapping, and transformation efforts across core banking systems; developed SQL queries and Power BI dashboards to monitor KPIs.
- Designed and optimized ETL workflows integrating ERP + third-party platforms, improving reporting accuracy and data consistency.
- Defined UAT scope, test scenarios, acceptance criteria, collaborated with QA to ensure successful validation cycles.

LAUSD -Los Angeles Unified School District

Business Intelligence Analyst

Los Angeles, CA • Aug 2024- Feb 2025

Project: Enterprise Software Enhancement and Data Modernization

- Executed Snowflake data mapping and transformation; used SQL to cleanse and align datasets, achieving **98% successful data migration**.
- Implemented data validation rules and quality checks to strengthen **data governance**, improving data accuracy by **80%**.
- Tuned cloud resource performance, reducing operational cost by **10%**.
- Rebuilt Power BI and Tableau dashboards to enhance KPI visibility across leadership teams.
- Supported enterprise BI applications: troubleshooting, issue resolution, upgrade testing, and cross-team coordination.
- Translated complex requirements into epics and user stories, improving roadmap delivery by **7%**.
- Partnered with PowerSchool and AWS teams to develop scalable cloud-based BI solutions.

University of Utah - Graduate Student Teaching Assistance/BI Analyst

Salt Lake City, UT • Aug 2023- July 2024

- Optimized admissions workflows in Salesforce, reducing application processing time by 35% and improving operational visibility.
- Maintained compliance documentation for 600+ international students, ensured data integrity across system audits.
- Outlined instructional materials, assignments, and grading rubrics, ensuring alignment with program objectives
- Mentored new assistants, accelerating ramp-up time by 50% through structured documentation and peer coaching.

NEHA NITIN GUJARE TAXATION AND ALLIED SERVICES - Business Systems Analyst

Mumbai, India • Mar 2020 – Jul 2022

Project: ERP Implementation and API Integration

- Tested API responses, data payloads, system behavior under various conditions, led defect triage resolution with development, QA teams.
- Mapped business workflows into integration use cases, data mapping, and interface specifications and worked with Solution architects and developers to design scalable, secure, and compliant integration solutions.
- Teamed with developers on platforms such as MuleSoft, Kubernetes(K8s), Apache Kafka, ACE/Apigee, implemented E2E solutions including Batch process, Real Time and Bulk Load APIs and Webservices across multiple systems
- Verified Go-Live activities including cutover planning, data migration, and post-deployment validation.
- Composed clear, testable user stories and acceptance criteria for integration features using JIRA and Confluence with product owners, developers and QA teams to ensure timely and iterative delivery.

VIMAL INTERTRADE PVT LTD- Business System Analyst (Data)

Mumbai, India • Aug 2018 – Mar 2020

Project: Software Implementation

- Led functional validation efforts during SIT and UAT phases, ensuring solutions met business requirements, design specifications, while decreasing post-release defects by 15%.
- Designed and implemented data models and visualization strategies, ensuring accurate reporting and supporting strategic planning across business units.
- Refined continuous feedback loops and refinement of integrations requirements throughout the sprint cycle and organized documentation in SharePoint and Confluence.
- Conducted throughout post- release monitoring of feature adoption and system performance, the insights gained drove continuous improvement yielding a measurable increase of 25% in positive stakeholder feedback scores.
- Facilitated daily- stand up meetings and sprint planning sessions, achieving a 90% user story completion rate per sprint and decreasing meeting preparation time by 20%

PIDILITE INDUSTRIES (Business Data Analyst)

Mumbai, India • Mar 2017 – May 2017

Project: Data Validation and Reporting Improvement Project

- Advanced project scope, objectives, and deliverables aligned with business goals and technical feasibility with project manager and presented workshops, demos, and executive briefing to drove consensus and transparency.
- Initiated with cross-functional team, QA Engineers, Stakeholders and Product Owners to refine 150+ user stories, ensuring delivered features achieved client acceptance criteria, resulted in 75% reduction post-launch bug reports.
- Tracked Agile artifacts such as user stories, process diagrams, and decision logs in tools like JIRA and Confluence, documented lessons learned and contributed to retrospective for team growth.
- Upgraded functional and non-functional requirements for APIs, middleware, and data exchange processes.

ACADEMIC PROJECT

Human Care Health App – Systems Analysis & BI Project

Built a Power BI dashboard capturing real-time resource utilization, cost variance, and project KPIs to improve strategic decision-making
