SUMMARY

Highly motivated Data Analyst with 1.8 years of experience in gathering requirements, data analysis, reporting, and visualization. Skilled in using Tableau and Power BI to create compelling dashboards and reports, and adept at transforming complex datasets into actionable insights to support data-driven decision-making.

Problem Solving - Data Visualization - Communication Skills - Data and Analysis

PROFESSIONAL EXPERIENCE

- NumPy Ninja , Delaware – Data Analyst(Remote) Aug 2023 – Present
- Gathered and defined dataset requirements based on project objectives and stakeholder needs.
- Conducted correlation analysis of biomarkers on sepsis patients based on age and gender for that created calculated field of Age Range calculations and created a dashboard for the identified Sepsis patients using vitals
- Conducted research and data collection. Applied statistical methods like box plot charts and Z score to avoid data anomalies.
- Designed a Tableau dashboard with automated email alerts, notifying doctors of deviations in two or more biomarkers to ensure prompt intervention and care.
- Consolidated and merged complex and simple datasets, facilitating improved data integration and analysis.
- Executed manual data cleaning using PowerBi to summarize, filter, impute, and consolidate clinical testing results, including MRI markers, lab tests, and cognitive assessments.
- Developed and presented visually appealing data visualizations and KPI s in PowerBi on demographic and health information.
- Conducted descriptive and statistical analysis, in Tableau resulting in key findings including more than 50% of diabetic patients having abnormal WBC have moderate and 30% diabetic patients showed severe cognitive decline.
- Conducted trend analysis and found a decrease in moderate cognitive decline among diabetic patients from Visit 1 to Visit 2 in Tableau.
- Managed, manipulated, and analyzed complex databases to extract meaningful insights.
- Developed and interpreted statistical charts and tables to present research findings effectively.
- Applied Agile methodology, collaborating in sprints using scrum and Trello for effective project management.

PSG Real Estate ,Austin – Accountant

March 2023-July 2023

- Gathering of requirements ,conducted trend analysis on property details, identifying patterns in rent payments, maintenance frequency, and water bill expenses using tenant ledgers. Implemented data-driven actions to improve operational efficiency by 15% and reduce overdue payments.
- Generated and presented operational reports on tenant bill payments, providing actionable insights to enhance financial management and property operations.

I energizer, Austin – Data Processing
2020- May 2021

Oct

- Validated and verified provider information against requirements, conducted searches for policy details on health insurance websites, and compiled comprehensive reports for submission to insurance carriers.
- Adapted to changing organizational needs by shifting projects and responsibilities, ensuring data accuracy and timely delivery of insights based on evolving requirements.

NGA Human Resources , United Kingdom – Payroll Associate

Feb 2012 - Feb 2015

- Performed detailed data analysis and validation of payroll data in Microsoft Excel to ensure accuracy and minimize errors across monthly, weekly, and fortnightly payrolls, including tax forms and voluntary deductions using software such as Moore Pay AIM and Pay Plan.
- Reviewed and adjusted payroll reports, ensuring proper approvals and timely execution of payments according to the statutory rules and regulations

EDUCATION - Sree Sankara College , Kalady, India

- *Bachelor of Commerce* *April 2003-April 2005*
- *Master of Commerce* *May 2007-May 2009*

TECHNICAL SKILLS

Business Intelligence Tools: Tableau, Microsoft PowerBi, Microsoft Excel

Database Technologies: Postgres SQL, Python(basic)

Other Tools: Jupyter Notebook, Trello, Slack, Google Sheets, JIRA, GitHub, Statistics

Certifications: Data Visualization with Tableau, Medical Terminology, Data Storytelling Basics, PowerBi Data Modeling with Dax, Intermediate SQL for Data Scientists, Complete SQL Bootcamp, Statistics

WORK STATUS :- H4 EAD (No sponsorship required)
