

SUMMARY

Experienced Data Analyst with over 3 years in Python, SQL, and R, creating interactive dashboards, overseeing ETL processes, and providing data-driven recommendations. Skilled in AWS and Google Cloud, expert in automating reports through Excel, Tableau, and Power BI to support data-backed business decisions. Recognized for analytical precision, clear communication, and a commitment to leveraging data for impactful insights.

TECHNICAL SKILLS

Programming Languages: Python, SQL, R, Java, JavaScript, PL/SQL, Shell Scripting
Data Visualization: Power BI, Tableau, QuickSight, Looker, Advanced Excel (VLOOKUP, Pivot Tables, Macros, VBA)
Databases: MySQL, PostgreSQL, Teradata, Oracle, MS SQL, BigQuery
ETL Tools: Informatica PowerCenter, IICS, Talend, SSIS, IBM DataStage
Cloud Platforms: AWS, Google Cloud
Tools & Technologies: Git, GitHub, JIRA, Putty, Jupyter Notebook
Methodologies: Agile, SDLC, Waterfall

PROFESSIONAL EXPERIENCE

Data Analyst Wipro Remote, USA	Feb 2024 – Present
- Engineered data solutions using BigQuery, Revamped ETL pipelines to ensure seamless data integration and scalability across multi-cloud environments, boosting operational efficiency by 30% and reducing data processing times by 40%. - Engineered Power BI and Tableau dashboards providing data-driven insights to stakeholders, improving decision-making speed by 25% and enhancing overall business efficiency. - Established rigorous data validation protocols and data quality checks within SQL and Excel, enhancing reporting accuracy by 25% and ensuring data integrity across all analytics processes. - Developed and maintained advanced Excel models for business forecasting and planning, utilizing functions, pivot tables, and VBA to streamline processes and enhance data accuracy. - Applied advanced statistical analysis methods, including hypothesis testing, regression, and A/B testing with Python (Pandas, SciPy) to identify actionable trends and drive data-informed recommendations, improving product functionality by 10%. - Conducted thorough exploratory data analysis (EDA) using Python libraries (Pandas, NumPy, Matplotlib) to uncover patterns, trends, and insights within large datasets, aiding in strategic decision-making and optimizing business processes. - Migrated legacy systems to cloud infrastructure (AWS/GCP), achieving zero downtime, reducing infrastructure costs by 15%, and enhancing scalability for future data initiatives. - Optimized critical processes through shell scripting, achieving a 25% increase in overall operational efficiency by eliminating manual, repetitive tasks.	
Data Analyst PG&E Cognizant India	Jun 2020 – Aug 2022
- Implemented complex data modeling and transformation techniques, actionable insights aligned with complex business needs, resulting in a 25% faster decision-making process and a 20% gain in data reliability. - Collaborated closely with cross-functional teams to implement data-driven strategies, achieving a 30% improvement in operational efficiency and optimized resource allocation across key projects. - Devised high-level design and Source-to-Target mapping documents, which improved project execution efficiency and lowered error rates by 15%, ensuring full alignment with business objectives. - Constructed complex SQL queries, functions, views, triggers, and stored procedures using Oracle PL/SQL, Teradata, T-SQL, and MS SQL Server, improving database performance by 40% and significantly reducing query execution time. - Automated efficient data cleaning, wrangling, and transformation processes with Python and SQL, cut data preparation time by 50% and ensuring high-quality data for analysis and reporting. - Led a migration project for 12+ databases to Teradata, which minimized data access times by 35% and enhanced system reliability, contributing to a 20% boost in overall productivity and operational agility. - Rectified over 200 critical issues in JIRA, reducing project delays by 20% and ensuring full transparency and accountability in project progress.	

EDUCATION

Master of Science in Computer Science The University of Texas at Arlington CGPA: 3.89/4.00	Aug 2022 – May 2024
Bachelor of Technology in Computer Science and Engineering KL University CGPA: 3.50/4.00	June 2016 – May 2020

CERTIFICATIONS

- [PwC Switzerland: Power BI Job Simulation](#)
- [Accenture: Data Analytics and Visualization Job Simulation](#)
- UiPath: RPA Certification
- Android Application Development

KEY PROJECTS

- ETL Pipeline Automation:** Designed and implemented ETL pipelines using Informatica PowerCenter, reducing data computation time by 30% for a financial services client.
- Power BI Dashboard for Sales Analysis:** Created interactive dashboards tracking sales performance, leading to data-driven decisions that increased revenue by 10%.

ACHIEVEMENTS

- Reduced database access time by 35% through a streamlined data migration project.
- Improved business decision-making by providing data-driven insights, contributing to a 15% increase in customer retention.
