

SUMMARY

- Experienced **Software Engineer** with around **4 years** of expertise in **Java (Spring Boot, Spring MVC)**, and **Python (Django, Flask)** specializing in microservices architecture and **RESTful APIs**.
- Knowledgeable in AI/ML integration with GANs, CNN, and Python frameworks for real-world data-driven solutions.
- Collaborative team player in Agile/Scrum environments, contributing to architecture reviews, mentoring peers, and maintaining high coding standards.
- Experienced in modern frontend integration (React.js, Angular, Next.js) to deliver complete end-to-end solutions.
- Adept at implementing monitoring and observability using Grafana, Prometheus, and ELK stack to ensure system reliability.
- Proficient in database query optimization, caching (Redis), and indexing strategies to ensure scalable, low-latency applications.
- Hands-on experience in CI/CD automation, containerization, and orchestration with Docker, Kubernetes, Jenkins, and AWS cloud services.
- Skilled in RESTful API & GraphQL design, applying Spring Security, OAuth2, and JWT for secure service-to-service interactions.
- Strong background in event-driven systems with Kafka, RabbitMQ, and JMS for reliable, asynchronous inter-service communication.
- Results-driven Software Engineer with 4+ years of experience in designing, developing, and deploying scalable microservices and cloud-native applications for enterprise systems.

WORK EXPERIENCE

Citi Group, NJ | Software Engineer

Dec 2024 – Current

- Architected a complex, interactive **React UI** with component-based architecture, improving UI state management and user interactions, thereby enhancing performance and user experience.
- Developed full-stack web applications using **MERN stack**, increasing website speed and improvement in user conversion rates.
- Executed comprehensive unit and integration tests using **Java Spring Boot (JUnit)**, automating backend API calls to enhance reliability, and wrote 20+ automated tests for API sanity testing.
- Integrated **Docker images** into **CI/CD pipelines**, enabling automated builds, testing, and deployments of **Java applications**.
- Designed and implemented scalable microservices with **Spring Boot**, utilizing **REST APIs** and **Apache Kafka** for robust inter-service communication, enhancing system reliability and performance.
- Accomplished **GraphQL** testing tools (GraphQL tester) to write comprehensive unit and integration tests for the GraphQL API, ensuring code quality.

KPIT, India | Software Engineer

July 2022 – July 2023

- Accomplished **Spring ORM** with **Hibernate** taking advantage of features like Annotation metadata, Auto wiring, and Collections to implement the DAO layer with Hibernate Session Factory, HQL, and SQL.
- Improved application responsiveness by using **RabbitMQ's** queues to buffer and process messages efficiently, leading to a 30% reduction in average response times.
- Utilized **JMS API** for implementing asynchronous communication, efficiently placing messages in the message queue to enhance responsiveness and scalability.
- Implemented search functionality using **Elasticsearch** with various searchable fields, including autocomplete, fuzzy search, and stemming, achieving a 92% search accuracy rate and reducing search query latency by 30%.
- Executed containerized applications on **AWS EKS**, achieving a 20% reduction in deployment times and optimizing resource utilization through scaling policies.

KPIT, India | Jr. Software Engineer

Dec 2020 – Jun 2022

- Connected an AngularJS front-end with a **Django** back-end through **Axios**, streamlining data flow and enhancing user interaction.
- Built and optimized advanced UI features with **PrimeNG** components, improving both application performance and overall user experience.
- Leveraged **Node.js Async/Await** to implement asynchronous workflows, boosting responsiveness by 35% and enabling the system to handle double the concurrent users efficiently.
- Customized a pre-trained **CNN** for specialized computer vision tasks (object detection, image segmentation) using transfer learning and fine-tuning, resulting in improved model accuracy.
- Developed a highly scalable **REST API** with **FastAPI**, maintaining system stability and responsiveness under a 2x increase in simultaneous API requests.

SKILLS

- **Methodologies:** SDLC, Agile/Scrum, Waterfall
- **Languages:** C++, Python, Java, SQL, JavaScript, TypeScript
- **Frameworks/Libraries:** Spring Boot, Spring MVC, Spring Cloud, React.JS, Node.JS, Express.JS, Next.JS, Angular, Angular.js, Django
- **Web Technologies:** HTML5, CSS3, JavaScript, jQuery, Ajax, XML, Redux, REST API, PrimeNG,
- **Cloud:** AWS (S3, SQS, SES, EC2, Lambda, ECS, CloudWatch, EKS)
- **Database:** MySQL, PostgreSQL, DynamoDB, Oracle, OpenEdge
- **Testing Tools:** Postman, Mockito, JUnit
- **CI/CD and DevOps Tools:** Git, GitHub, Maven, Jenkins, GraphQL, Docker, Kubernetes, Grafana, Ansible, RabbitMQ, Kafka

EDUCATION

Master of Science in Computer Science | Rowan University, NJ (GPA: 3.8/4)

May 2025
