

Akash Devani

San Jose, CA | (408) 831-8334 | akashdevani12@gmail.com | linkedin.com/in/akash-devani

SUMMARY

Software Engineer skilled in Java backend development, distributed systems, cloud-based solutions, and core CS fundamentals (DSA, OOPs, System Design). Experienced in applying AI techniques to solve complex problems.

EDUCATION

Master of Science in Software Engineering

Jan 2024 - Dec 2025

San Jose State University, San Jose, CA

Coursework: Enterprise Distributed System, Software Engineering, Software Quality Assurance and Testing

Bachelor of Engineering in Computer Engineering

Jul 2019 - Jun 2023

Gujarat Technological University, Gujarat, India

Coursework: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Networking

TECHNICAL SKILLS

Programming/Scripting Languages: Java, Python, JavaScript, HTML, CSS

Frameworks/Testing: Spring, Spring Boot, Apache Kafka, JUnit, Selenium

Web Technologies/Databases: React.js, SOA, REST, SQL, PostgreSQL, MongoDB

DevOps/Cloud: Git, Agile Methodologies, AWS (EC2, ELB, Auto Scaling, S3, Lambda, RDS), OAuth2/JWT

Others: Data Structure & Algorithms, Object-Oriented Programming, Coding Design Pattern, System Design

EXPERIENCE

Java Software Engineer – Avrut Solutions

Jan 2023 - Dec 2023

Technology Stack: Java, Spring Boot, Microservices, HTML, CSS, JavaScript, PostgreSQL, AWS Gujarat, India

- Designed and implemented a microservices-based system using Spring Boot, handling peak loads of 1K+ RPS.
- Utilized data structures and OOPs concepts to architect scalable services, resulting in 20% reduced maintenance.
- Engineered PostgreSQL and MongoDB hybrid storage, reducing query latency 35% and enabling large-scale ops.
- Built full-stack web application with HTML5, CSS3 and JavaScript and deployed on AWS with CI/CD pipeline.
- Utilized Git for version control and implemented automated testing with JUnit, boosting code coverage by 35%.
- Collaborated in cross-functional Agile teams, reviewing peer code and contributing to internal documentations.

Software Engineer Intern – Avrut Solutions

May 2022 - Sept 2022

Technology Stack: Distributed System, Paxos Consensus Algorithm, Java

Gujarat, India

- Improved system uptime by 45% by designing a primary-backup server architecture, handling server failures.
- Integrated heartbeat monitoring with a central server to enforce a single active leader, boosting stability by 40%.
- Implemented a multi-instance Paxos consensus algorithm, ensuring strong consistency in a distributed system.
- Built a log-based architecture to get 100% linearizable operations and fault-tolerant recovery by replaying logs.

PROJECTS

Smart Academic Alerts System

Aug 2024 - Nov 2024

Technology Stack: Distributed Computing, Python, Kafka, PostgreSQL, Twilio

- Built real-time alerts with Kafka & Python, delivering 10K/day academic notifications with AI-driven Pub/Sub.
- Initiated large-scale multi-channel alerts (Email, SMS, WhatsApp) via Twilio/smtplib, ensuring 95% delivery.
- Achieved reliability with AI-based auto-retry and urgent-event prioritization, overcoming batch system's flaws.

Role-based Learning Management System

Jan 2024 - Apr 2024

Technology Stack: Java, Spring, Spring Boot, AWS, MySQL, OAuth2, Agile

- Led backend development to replicate key features of Canvas LMS, delivering 15+ RESTful APIs using Spring.
- Engineered role-based access control via OAuth2 to enforce distinct permissions, achieving 100% secure access.
- Optimized MySQL schema to manage 1,000+ users' data, enabling efficient storage and retrieval of operations.
