EDUCATION

Rutgers University <i>Masters of Science in Computer Engineering - Machine Learning</i>	New Brunswick, NJ Sep 2024 – Jan 2026
Rutgers University <i>Bachelor of Science in Electrical and Computer Engineering</i>	New Brunswick, NJ Sep 2020 – May 2024

EXPERIENCE

Amazon <i>Software Development Intern</i> - Used AWS Services and Java to automate a validation workflow to ensure Prime Video ads are properly delivered - Reduced error rate by 82% and helped save between 350 - 750 million in revenue - Collaborated with the development team to integrate unit testing to ensure system resilience and ensure proper error handling	Jun 2025 – Aug 2025 New York, NY
Siemens Healthineers <i>Software Engineer Intern</i> - Used Python to analyze C and C++ files to identify and rectify discrepancies and errors in software developments and improve workflow efficiency by 50% - Built unit tests for C++ files vital to product functionality - Utilized Azure DevOps Server to automate the build and deployment process, improving efficiency and reducing manual errors. - Collaborated with the development team to integrate unit testing into the CI/CD pipeline, enhancing overall software quality and reliability. - Used Python to parse through log file data and used the data to identify common patterns causing errors by building and training a machine learning model	June 2024 – Aug 2024 Remote
Rutgers Capstone - Award Winner <i>Lead Software Engineer</i> - Built and developed software for a fully autonomous delivery vehicle from the ground up - Developed a program in Linux on ROS2 that uses SLAM and Nav2 to map out an area and navigate through that area - Ran simulations using Rviz and Gazebo to test autonomous functions - Achieved full automation for around 350 dollars and won an award for our innovative and budget-friendly design	Jan 2024 – April 2024 New Brunswick, NJ
Peblo Technologies <i>Software Engineer Intern</i> - Developed a mobile app for a company with over 20,000 users to expand their business - Collaborated with front-end and back-end developers to enhance visual clarity and app responsiveness by 33% - Conducted code reviews, ensuring adherence to coding standards and best practices	July 2023 – Aug 2023 Plainsboro, NJ

PROJECTS

Full Stack Banking Web Application <i>JavaScript, Node.js, Git, SQL</i> - Designed and implemented a user-friendly mock banking platform to streamline financial transactions, enhance customer experience, and ensure secure data handling - Worked with a team of 12 front-end and back-end developers to create a full-stack web application - Utilized Node.js, Javascript, and HTML/CSS to build a highly scalable web application and SQL to store, retrieve, and manipulate user data Link to project	Sep 2023 – Dec 2023
