EDUCATION

Degree	Institute/Board	CGPA/Percentage	Year
B.Tech., CIE	Indian Institute of Technology, Jodhpur	[6.8]	[03/2025]

EXPERIENCE

- Aionic LTD** 
Data Engineer 03/2025 - 06/2025
London, UK (Remote)
 - Developed web scraping pipelines using Python (BeautifulSoup, SerpAPI) to extract and process data from 50+ sources, optimizing data collection efficiency by 25.
 - Implemented NLP summarization and relevance grading systems with Ollama AI models (Llama3, DeepSeek), achieving 90.
 - Engineered end-to-end data processing workflows including PDF extraction, ROUGE scoring, and secure API integrations for cloud deployment.
 - Technology used: Python, BeautifulSoup, SerpAPI, Ollama, NLP, ROUGE, API Integration.
- Kinetic Click** 
Front-end Developer 09/2024 - 11/2024
Bengaluru, Remote
 - Engineered and enhanced dynamic, user-centric features for KINETIC CLICK's web applications using HTML, CSS, JavaScript, TypeScript, and React.js.
 - Partnered closely with UI/UX designers and backend engineers to build responsive, scalable interfaces, developing additional pages and reusable components.
 - Performed thorough code reviews to elevate code quality, ensure maintainability, and address cross-browser compatibility, significantly improving project efficiency.
 - Conducted Technology used: HTML, CSS, JavaScript, TypeScript, React.js, Tailwind, Bootstrap.

Student researcher

Dr. Amit Kumar Rathi (Onsite) Jan 2022 - June 2024

Technology used: Python, Algorithms, Monte Carlo Simulation

- Successfully solved the unsolved SOSPSA Model problem and developed its complete implementation code.
- Demonstrated advanced problem-solving skills and expertise in complex computational analysis.
- Applied in-depth knowledge of algorithms and optimization techniques to achieve the solution.
- Developed a Monte Carlo simulation code executing 1,000,000 iterations to accurately compute the MCS value.

PROJECTS

- Deepfake Academic Text Detection:**
Tools: Python, TensorFlow Forensic, Scikit-learn, GLTR, NumPy, Pandas, Matplotlib
 - Automated identification of LLM-generated academic fraud by developing a hybrid CNN-RNN model trained on human/AI text pairs from ChatGPT-4, Claude, and Gemini outputs.
 - Utilized multi-scale CNNs for forensic stylometric pattern extraction and LSTMs for temporal drift analysis, implementing contrastive learning to amplify detection signals between authentic and synthetic text.
 - Pioneered embedding watermarking techniques through latent space perturbations to enhance model robustness, achieving 99.1.
- Disease Diagnosis from Medical Reports**
Tools: Python, TensorFlow, Keras, ResNet50, Xception, Pandas, NumPy, Matplotlib
 - Automated the diagnosis of chronic diseases like tuberculosis, cancer, and COVID-19 by developing a deep CNN model trained on annotated chest X-ray and blood cell image datasets.
 - Utilized transfer learning with pre-trained models like ResNet50 and Xception to achieve high accuracy and rapid convergence on small datasets.
 - Fine-tuned complex CNN architectures to reduce healthcare workloads during the pandemic by enabling reliable disease detection.

Online Educational Website

- Developed a college search website with React.js, HTML, and JavaScript, displaying top colleges by government status and fees.
- Built a responsive college finder using React.js, J SX, and state management, showing top institutions based on user criteria.
- Optimized app with hooks and Redux for efficient state management, college filtering and ranking by status and fees.

SKILLS

Languages: Python, C, C++, SQL, JavaScript, TypeScript

Tech: TensorFlow, PyTorch, Keras, Django, Node.js, MongoDB, MySQL, Pandas, NumPy, AWS, Docker

Tools: Git, Jupyter, Colab, VS Code, Tableau, Power BI, Advance Excel

Other: scikit-learn, SciPy, Matplotlib, Seaborn, SolidWorks, AutoCAD, STAAD.Pro

Course

Professional Certificate in Data Science and Analytics (MIT xPRO)

Applied Data Science Program: Leveraging AI (MIT Professional Education)

Introduction to Algorithms (MIT OpenCourseWare)

Machine Learning with Python: Linear Models to Deep Learning (MITx)

Applied Generative AI for Digital Transformation (MIT Professional Education)

No Code AI and Machine Learning (MIT Professional Education)

POSITIONS of RESPONSIBILITY

- | | |
|---|------|
| • Asst. Head, Varchas, IIT Jodhpur SportsFest | 2023 |
| • Asst. Head, Prometeo IIT Jodhpur Techfest | 2024 |
