Summary

Data Analyst with hands-on experience in data visualization and automation. Developed interactive dashboards using Tableau and automated reporting processes with Python, enhancing decision-making and operational efficiency. Eager to apply data science skills in a business environment to drive innovative solutions and optimize business outcomes.

Education

University of Maryland

Aug 2021 - Jun 2025

Bachelor of Science in Information Science, Minor in Technology Innovation Leadership, Presidential Scholarship

- **Coursework:** IIBA ECBA Certificate (In Progress March 2025)

Skills

- SQL, Tableau, Power BI, Oracle, Business Intelligence, Splunk, SAS, Data Science, Business Analytics, Agile, Java, Salesforce, Git, Azure, KPI, Big Data, Data Modeling, Data Pipelines, Python, C/C++, C, ETL, Spark, R, Data Visualization, Data Analytics, UX/UI, Google Cloud, ELK, Kafka, PHP, Excel

Work Experience

Bank of America

Jun 2024 - Aug 2024

Global Technology Data Analyst Intern

Charlotte, NC

- Utilized Tableau to develop interactive dashboards visualizing risk metric variance across various sub-lines of business, enhancing executive decision-making by providing clear insights into key areas of concern
- Connected SQL databases containing 500+ metrics to Tableau, creating dynamic dashboards that updated monthly, enabling real-time monitoring and analysis of performance metrics
- Developed Python scripts to automate the generation and distribution of metric reporting submission data monthly, reducing manual workload by 30 percent and ensuring timely and accurate reporting
- Presented comprehensive findings and dashboard functionalities to C-suite executives, leading to strategic decisions that improved operational efficiency and regulatory compliance
- Contributed to a 10 percent increase in metric reporting accuracy, directly enhancing business growth and operational effectiveness across the organization

Marriott International

Jun 2022 - Aug 2023

Consumer Operations and Data Analyst Intern

Bethesda, MD

- Led migration of Marriott Global Platform Data to Splunk Interface, enhancing data accessibility and analytics capabilities
- Designed and implemented dashboard models based on requirements gathered from mobile key stakeholders and vendors, improving operational insights and decision-making
- Developed Splunk dashboards using mobile key logs that alerted and charted common issues, resulting in a 5 percent reduction in operational downtime
- Presented findings to company executives, leading to further development of the project for global implementation
- Implemented Apache Kafka to streamline hotel check-in data management and error reporting, ensuring seamless operations
- Utilized Jira to efficiently report and resolve data-related issues, enhancing data accuracy and team productivity
- Led a team of interns to create a comprehensive plan using Agile methodologies to increase CEC employee retention and improve work culture, resulting in a more engaged and satisfied workforce

Projects

AWS, MySQL, PHP, RSA, ML Algorithms

Aisle Smart Parking

Mar 2021 - Apr 2021

- Built a responsive application that used machine learning to detect and notify users of open parking spots on a college campus
- Worked with RFID sensors attached to Raspberry PI that sensed open parking spots
- Used MySQL MariaDB implementation on EC2 to store data, secured database using RSA
- Developed front end using PHP code where current parking status and predictions were shown dynamically
- Implemented machine learning algorithms to predict open parking spots

Software Developer Intern And Recruitment Lead

Mclean, VA

TeensUnited

Mar 2020 - Aug 2020

- Founded a non-profit to deliver groceries to senior citizens for free during the Covid-19 pandemic using a network of recruited volunteers
- As a co-founder, participated in the high level hiring decision process for new leadership positions, organized meetings with clients and stakeholders, and implemented technical, organizational, and communication skills
- Raised a grant of 25,000 dollars, recruited a network of 200 volunteers across Virginia, New Jersey, and Florida
- Designed a website using HTML and backend database system to receive and manage orders
- Developed key operational initiatives and implemented scalable processes to expand the delivery team and drive business growth by 20 percent a week
