

Akela Burton

Opelika, Alabama • 334-750-1415 • akelajenay25@gmail.com

Professional Summary

Healthcare IT professional with over 5 years of diverse experience spanning clinical systems consulting, application architecture, informatics, and laboratory support. Skilled in Cerner/Oracle Health implementations, clinical application optimization, and health IT project coordination. Proven track record of enhancing workflows, improving system performance, and supporting large-scale implementations for both clinical and financial systems.

Professional Experience

East Alabama Medical Center (EAMC) – Opelika, AL

Application Systems Architect – Application Support
September 2024 – Present

- Provide support for financial and clinical applications by collaborating with departments to investigate problems and identify solutions.
- Adapt to technology changes, anticipate potential issues, and enhance system functionality while following change control processes.
- Prepare and execute unit, system, and integration testing for implementations, upgrades, and fixes.
- Maintain knowledge of application functionality and communicate updates to ensure smooth operations across departments.
- Coordinate with customers and coworkers for project completion and timely issue resolution.
- Participate in implementation and system improvements to ensure efficient workflows and alignment with organizational goals.

Oracle Cerner Health – Remote

Clinical Healthcare Consultant
2022 – 2023

- Collaborated with the Department of Veterans Affairs (VA) and Department of Defense (DoD) to assess system needs and implementation requirements.
- Conducted system and workflow assessments to identify opportunities for optimization.
- Developed implementation plans with timelines, milestones, and deliverables, achieving a 90%+ on-time delivery rate.
- Coordinated with developers, clinicians, and project managers to ensure effective solution rollouts.
- Provided guidance to clients during system adoption and transition.

Mobile County Health Department – Mobile, AL

Clinical Contact Tracing Specialist

2020 – 2022

- Conducted contact tracing investigations to identify exposures and reduce disease spread, achieving a 90% tracing success rate.
- Collaborated with public health authorities to notify and educate individuals promptly.
- Used data analysis tools to monitor disease spread, contributing to a 20% reduction in transmission rates.
- Maintained compliance records and documented accurate contact tracing data.
- Participated in workshops and trainings to enhance public health protocols.

Scribe Innovations – Mobile, AL

Clinical Informatics Specialist

2016 – 2017

- Assisted physicians by documenting medical histories, symptoms, and physical exam findings in real time.
- Transcribed procedures and treatment plans as directed by providers.
- Managed EHR systems for accuracy and timely updates.
- Facilitated communication among healthcare teams to improve workflow.

University of South Alabama Health Systems – Mobile, AL

Clinical Laboratory Technician

2016

- Collected and prepared specimens for analysis, ensuring accuracy and adherence to protocols.
- Performed routine laboratory tests and ensured equipment calibration.
- Documented and entered test results accurately into laboratory systems.
- Maintained safety and contamination-free environment through strict protocol adherence.

Education

University of South Alabama | Bachelor of Science: Health Sciences | 2013 – 2018

University of Florida (Online) | Master of Science: Pharmaceutical Sciences | 2021 – Present
