

AKHIL GUGULOTH

Data Analyst

TX, USA | +1 (940) 597-3449 | akhilguguloth.ag@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

- Data Analyst with **4+ years** of experience in **healthcare and financial services**, delivering actionable insights from **datasets exceeding 10TB** to improve operational efficiency, reduce costs, and enhance care quality.
- Expert in **designing and automating ETL workflows** using Informatica, Alteryx, dbt, Azure Data Factory, Apache Airflow, and Python, processing millions of records daily.
- Skilled in **machine learning, predictive modeling, and statistical analysis** using **Python, R, Spark, Scikit-learn, TensorFlow, and Google Cloud AutoML**, with experience deploying models in cloud environments (**AWS, Azure, GCP, Snowflake**).
- Proficient in **developing interactive dashboards and reports** using Tableau, Power BI, Qlik Sense, SAP BusinessObjects, and Excel (Pivot Tables, VBA, Macros), enabling **data-driven decision-making and executive reporting**.
- Adept at **cross-functional collaboration with IT, finance, and operations teams**, standardizing data definitions, improving reporting efficiency by 20%, and mentoring junior analysts to accelerate team performance.
- Known for **leveraging advanced analytics to identify high-risk patient cohorts, predict financial outcomes, and optimize business processes**, ensuring strict compliance with HIPAA and GDPR regulations.
- **Core Strengths include:** Predictive Analytics | Machine Learning | Big Data Analytics | ETL & Data Pipelines | Data Visualization | Cloud Analytics | Data Governance | Stakeholder Collaboration | Business Insights & Reporting | Advanced Statistical Analysis

CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate
- Google Data Analytics Professional Certificate (Coursera)

TECHNICAL SKILLS

Programming Languages	Python, SQL, R, Scala, SAS, Java
Libraries & Package	NumPy, Pandas, Matplotlib, Seaborn, ggplot2, Scikit-learn, TensorFlow, SciPy, dplyr
Visualization Tools	Tableau, Power BI, SAP BusinessObjects, Qlik Sense, Looker, Advanced Excel (Pivot Tables, VLOOKUP, VBA), D3.js
Cloud Platforms	AWS (Redshift, S3, Glue, Lambda, DynamoDB), Azure (Data Factory, Synapse, Databricks), Snowflake, GCP (BigQuery, Cloud AutoML)
Databases	SQL Server, PostgreSQL, MySQL, MongoDB, Cassandra, DynamoDB
ETL & Data Processing Tools	Informatica, Alteryx, SSIS, Apache Airflow, dbt, Apache NiFi, Spark, Hadoop, Talend
IDEs & Tools	Visual Studio Code, PyCharm, Jupyter Notebook, IntelliJ, Git/GitHub, ServiceNow, Jira
Analytics & Governance	Data Governance, Data Quality, HIPAA, GDPR, Data Masking, Encryption, Probability Distributions, ANOVA, Confidence Intervals, Model Validation
AI & Automation	Google Gemini Enterprise, Microsoft 365 Copilot (Analyst Agent), AlphaSense Carousel

EXPERIENCE

Data Analyst CVS Health – CT	Jun 2024 – Present
• Extracted and aggregated clinical, prescription, and retail health data for 75,000+ members using PostgreSQL, advanced SQL joins, and Python, supporting chronic disease management programs. • Developed a logistic regression model predicting uncontrolled diabetes (HbA1c > 8) within 6 months using EHR, prescription, and retail encounter data, enabling proactive interventions. • Automated ETL workflows using Azure Data Factory, Apache Airflow, and dbt, ingesting data from multiple sources, reducing pipeline latency by 5%, and accelerating care insights.	

- Cleaned and transformed pharmacy and clinical encounter data with **Python (Pandas, NumPy)**, improving data consistency by 13% and enabling higher-quality insights for Care Management and HealthHUB teams.
- Built and deployed **Power BI, Tableau, and Qlik Sense dashboards** to visualize medication adherence, blood pressure control, and HbA1c levels, supporting STAR ratings and population health initiatives.
- Leveraged **Spark on Azure Databricks** and **Google Cloud AutoML** for predictive modeling across millions of member records, optimizing risk stratification and clinical intervention targeting.
- Ensured strict compliance with **HIPAA and GDPR** while handling sensitive patient data.
- Collaborated cross-functionally in **Agile sprints** with pharmacy operations, MinuteClinic, and analytics governance teams to improve reporting cadence and stakeholder alignment.

Environments: Python (Pandas, NumPy), R, SQL, Apache Spark, Azure Data Factory, Databricks, Power BI, Tableau, Qlik Sense, Snowflake, AWS (S3, Redshift, Glue, Lambda), HIPAA compliance, Google Cloud AutoML, dbt, Apache Airflow, Excel (Pivot Tables, VBA)

Data Analyst | Deloitte – India

Jan 2021 – Jun 2023

- Designed and implemented **interactive Tableau, Power BI, and Qlik Sense dashboards** visualizing credit risk metrics, loan performance, and default probabilities for executive decision-making.
- Performed **EDA using SQL, Python, and R**, improving credit risk model accuracy by 12% by identifying critical borrower factors.
- Built and maintained **ETL pipelines using Informatica, Alteryx, Spark, Apache Airflow, and dbt** to integrate data from internal databases, CRM systems, and third-party credit bureaus, ensuring high-quality inputs for risk modeling.
- Applied **K-Means clustering** for customer segmentation, identifying four borrower personas to inform credit strategies.
- Executed **distributed ETL processing with Apache Spark and NiFi**, handling 500,000+ loan records and improving processing speed by 5%.
- Designed and implemented **data warehousing solutions (Snowflake, Redshift, Teradata)** consolidating loan, customer, and transactional data, increasing reporting efficiency by 20%.
- Conducted **A/B testing, regression analysis, and time-series forecasting (ARIMA)**, improving predictive accuracy for loan defaults and financial forecasting.
- Automated manual reporting with **Excel VBA**, saving 20+ hours weekly and reducing errors by 65%.
- Leveraged **AWS S3, Redshift, Snowflake, and GCP BigQuery** for secure, scalable storage and analytics, with optimized partitioning and query performance.

Environments: Python, R, SQL, SAS, Apache Spark, Informatica, Alteryx, Apache Airflow, dbt, Tableau, Power BI, Snowflake, Redshift, AWS (S3), Excel VBA, ERP/CRM systems, GDPR/HIPAA compliance

EDUCATION

Master of Advanced Data Analytics from University of North Texas, TX, USA

B.Com. (Computer Applications) from Jahnvi Degree & PG College – Affiliated to Osmania University
