SUMMARY

Software Engineer with 5 years of experience in Java, Spring Boot, React, and full-stack development, delivering scalable, user-centric solutions and driving performance improvements. Proficient in crafting secure RESTful APIs, optimizing application architectures, and enhancing UI/UX for seamless user experiences.

TECHNICAL SKILLS

Languages:	Java, JavaScript (ES6+), TypeScript, SCSS, HTML5, CSS3, SQL
Frameworks & Libraries:	Spring Boot, Spring MVC, Hibernate, React.js, Redux, Material-UI, Next.js, Bootstrap, Tailwind CSS, Node.js, Express.js, Angular
Databases:	MySQL, MongoDB, PostgreSQL, Oracle DB, DynamoDB
Tools & Technologies:	AWS (EC2, S3, Lambda, RDS), GCP, Git, GitHub, Jest, Cypress, Webpack, NPM, Docker, REST API Maven, Kubernetes, Bitbucket

WORK EXPERIENCE

Humanitarians.AI	Nov 2024 – Present
Software Engineer	Boston, USA
- Developed a full-stack social platform app for healthy Indian food, using (Spring Boot), React.js, and MongoDB - Enhanced UI/UX workflows using data-driven insights, reducing user dropout rates by 30% through A/B testing and iterative design improvements - Optimized RESTful APIs using Java Spring Boot, improving data exchange efficiency and cutting server response time by 25% - Migrated services to AWS Cloud with S3, EC2, and RDS, automating infrastructure with CloudFormation for high availability and faster deployments	
Bear Brown & Company	Jul 2024 – Nov 2024
Software Engineer	Boston, USA
- Led the backend development of a Kanban dashboard, building a modular system with Express.js, JWT authentication, and role-based access control (RBAC), while guiding the team through code reviews and CI/CD deployment - Architected a scalable MongoDB schema, optimizing data models like Users, Projects, and Tasks, ensuring data normalization and high performance for complex queries, while securing access to data through authentication layers - Developed and deployed secured RESTful APIs for project management with CRUD operations, integrating business logic for task assignments, status updates, and permissions. Enhanced error handling, reducing bugs by 35% - Deployed backend services on Amazon Web Services (AWS), configuring EC2 instances and MongoDB for high availability, implementing SSL certification, and conducting load testing to ensure scalability under high traffic	
Merizon Technologies	Oct 2018 – Aug 2022
Software Engineer	Delhi, India
- Engineered JWT-based authentication and authorization in Node.js and Express.js, securing access for 10,000+ users and ensuring compliance with industry standards - Implemented TDD with JUnit, Jest, and Cypress, ensuring 95% test coverage and reducing post-launch bugs by 20% for cleaner, maintainable code. - Developed and deployed RESTful APIs using Node.js, Express, and AWS API Gateway to ensure seamless data communication across applications - Utilized AWS Lambda to process 100,000+ requests per day, resulting in an average response time of under 100 ms. - Collaborated on the implementation of a micro-frontend architecture using React, reducing initial load time by 30% and improving overall performance by 25%	

PROJECTS

Leetify (JavaScript, React, Node, Express, MongoDB, Redux, HTML, SCSS, Material-UI, Jest, Postman) [Github] [Demo]
Built a coding platform for remote code execution with 3+ features (code submission, visualization, progress tracker)
Rentwheel (Java, Spring Boot, Hibernate, MySQL, Maven, JUnit, Thymeleaf, HTML5, CSS3) [Github]
Developed a scalable car rental application using Java Spring Boot with MVC architecture, integrated Spring Security for robust authentication and role-based access control, and implemented DAO patterns with Hibernate ORM for efficient data management

EDUCATION

Master of Science in Information Systems	May 2024
Northeastern University (GPA: 3.63)	Boston, USA
Coursework: Web Design (MERN), UI/UX, OOP (Java), Web Dev (Spring boot), Database (SQL/NoSQL), Testing (Selenium)	
Graduate Teaching Assistant, Northeastern University	Sep 2023 – Apr 2024
Mentored 200+ students in Web Design and User Experience using the MERN stack (MongoDB, Express.js, React, Node.js), assisting with project development, debugging, code reviews, and best practices in responsive design and user-centric interfaces	
BE in Information Technology	Aug 2017
Mumbai University	Mumbai, India
